The Skylark Paul Donald:

The Skylark Paul Donald, 2010-06-30 The Skylark is one of Britain's most popular and inspirational birds and in recent years it has also been one of the most newsworthy. The species population has plummeted as a consequence of changes in farming practice and the RSPB has launched a major research and fund raising campaign to save the blithe spirit from further decline. This book looks at all aspects of the life of the Skylark from its biology migratory patterns breeding behaviour and habitat requirements to its role in legend and folklore. It also discusses its recent rapid decline which has led to the species being placed on the top priority red list of Birds of Conservation Concern by the leading governmental and non governmental conservation organisations in the UK. Three closely related species Oriental and Japanese Skylarks and the enigmatic Raso Lark are also discussed.

Fighting for Birds Dr. Mark Avery, 2012-07-02 Devoted to birds and wildlife since childhood Mark's early scientific research at Oxford Aberdeen and the RSPB provided a solid background for his management ambassadorial and political lobbying activities which were to follow and his larger than life yet quietly humane personality has provided the final tools in his own unique nature conservationists toolbox. In this book Mark mixes a great many stories from his professional life at the RSPB with personal anecdotes and passionate arguments on past and present issues in bird and nature conservation. He shows us something of the many scientists whose work paves the way for conservation action places domestic conservation into an international context takes us behind the scenes to glimpse the politicians who have worked with him or against him along the way. Mark leaves us armed with practical tips and a guiding philosophy to take wildlife conservation through the troubled years that lie ahead. A personal philosophical and political history of 25 years of bird conservation this book provides an instructive and amusing read for all those who would like a glimpse into the birds and wildlife conservation world what the issues are what must be done how it can be done and the challenges highs and lows involved.
