Effects of the American Airlines/TWA Transaction and Other Airline Industry Consolidation on Competition and the Consumer United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2004 **Building the Virtual State** Jane E. Fountain, 2004-05-28 The benefits of using technology to remake government seem almost infinite The promise of such programs as user friendly virtual agencies and portals where citizens can access all sections of government from a single website has excited international attention The potential of a digital state cannot be realized however unless the rigid structures of the contemporary bureaucratic state change along with the times Building the Virtual State explains how the American public sector must evolve and adapt to exploit the possibilities of digital governance fully and fairly The book finds that many issues involved in integrating technology and government have not been adequately debated or even recognized Drawing from a rich collection of case studies the book argues that the real challenges lie not in achieving the technical capability of creating a government on the web but rather in overcoming the entrenched organizational and political divisions within the state Questions such as who pays for new government websites which agencies will maintain the sites and who will ensure that the privacy of citizens is respected reveal the extraordinary obstacles that confront efforts to create a virtual state These political and structural battles will influence not only how the American state will be remade in the Information Age but also who will be the winners and losers in a digital society **Airline Consolidation** United States. Teaching Crowds John Dron, Terry Anderson, 2014-09-01 Within the rapidly expanding field of educational technology learners and educators must confront a seemingly overwhelming selection of tools designed to deliver and facilitate both online and blended learning Many of these tools assume that learning is configured and delivered in closed contexts through learning management systems LMS However while traditional classroom learning is by no means obsolete networked learning is in the ascendant A foundational method in online and blended education as well as the most common means of informal and self directed learning networked learning is rapidly becoming the dominant mode of teaching as well as learning In *Teaching Crowds* Dron and Anderson introduce a new model for understanding and exploiting the pedagogical potential of Web based technologies one that rests on connections on networks and collectives rather than on separations Recognizing that online learning both demands and affords new models of teaching and learning the authors show how learners can engage with social media platforms to create an unbounded field of emergent connections These connections empower learners allowing them to draw from one another's expertise to formulate and fulfill their own educational goals In an increasingly networked world developing such skills will they argue better prepare students to become self directed lifelong learners

School Leadership in the Context of Standards-Based Reform Louis Volante, 2012-05-16 Although standards based reform emerged in the United States and the United Kingdom the idea has spread across the world as an approach to systemic reform It might appear that there is a world wide tsunami of standards based reform that will standardize and homogenize the educational system across the globe This volume makes it very clear however that there is no one approach to standards based reform and countries change there is a danger in paying attention to its evolution and impact in only one context That is what makes this volume so valuable Louis Volante has drawn together descriptions from a wide range of countries all involved in large scale reform and using standards and assessments as part of their process What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals values and processes I am sure you will find this book as interesting and challenging as I have a gem that pushes your thinking and does not allow readers to remain neutral Lorna Earl Large Scale School Reform and Social Capital Building Ian R.

Haslam, Myint Swe Khine, Issa M. Saleh, 2013-06-26 This book introduces and explores the nature of large scale reform and offers a fresh insight into the importance of social capital and professional development leadership for teachers and school management It synthesizes research on the role of the professional development leader and the importance of social capital in schools and examines its potential to impact large scale system wide reform projects The text presents a range of international examples and theories from renowned researchers and educationists which illustrate the challenge of raising the prominence of education social capital in schools Considering crucial research that informs effective adult learning interventions underlying themes supporting constructivist and transformative interventions are identified and woven into the narrative Factors and variables needed to encourage and implement initiatives are examined and each section is accompanied by case studies from around the world The book is split into five sections and twelve parts which include The Lesson of Large Scale Reform for Leadership Development Assessment of Wide Scale Educational Reform Initiatives Developing Social Capital through National Education Reform System Improvement through Professional Learning
