Network Comment : This Network is where we are determining the length of the Table of Bits that we are going to store all of our "22s" and "23s" up to a total of 20, until we unload them and use them to turn on the Red and Yellow Lamps. S40.0 is a Special Memory Bit you can use in your program as many times as you want. It is called "Always On" and just like the name indicates, it is always ON. This bit comes in handy for when you are short on physical inputs and don't want to use one of your contributions.
