

Multi-zone function

What is the multi-zone function?

The multi-zone function allows you to play back different input sources in the room where the unit is installed (main zone) and in another room (Zone2). For example, while you are watching TV in the living room (main zone), another person can listen to radio in the study room (Zone2).

You can select the following input sources for Zone2:

- Analog audio input (AV 5-6, AUDIO 1-2, V-AUX (FDX-A820 only))
- TUNER (FM/AM radio)
- USB (including iPod)
- SERVER
- AirPlay
- Network streaming services (available on some models)

- Audio sources input from the HDMI or digital audio input jacks cannot be output to Zone2.
- AirPlay is available in Zone2 only when AirPlay playback is ongoing in the main zone.

This guide explains how to set up a Zone2 system using the unit's internal amplifier.

This will enable you to use the 5.1-channel speaker system in the main zone and 2-channel speaker system in Zone2 simultaneously. (When Zone2 output is disabled, you can use the 7.1-channel speaker system in the main zone.)

For more information, refer to the Owner's Manual in the supplied CD-ROM.

- The illustrations of the main unit and remote control may be different from the actual product depending on the model.

those points are discussed together On the other hand where they diverge the authors have used separate headings for Civil and Criminal when that seems appropriate One of the objectives of the Editorial Analysis in this text is to deal with the interrelationships of the various Rules The authors have noted those areas where the Rules differ from pre Rules case law or statutory provisions Some of the Rules changed the prior Texas evidence law and although many of the Texas Rules agree with the Federal Rules a number differ significantly
