Thank you for selecting this YAMAHA NS-90 speaker system.

PRECAUTIONS

- Read these precautions carefully before using your speaker.
- Any time you move the speaker, the relative position of the speaker to the amplifier is important. Never allow your amplifier to be driven into "clipping." Otherwise the speaker may be damaged.
- When using an amplifier with a rated output power higher than the nominal input power of the speaker, care should be taken to prevent the speaker from being driven into clipping.
- Do not place the speaker on a surface that is not level. This may damage the front baffle. To view, use with a dry soft cloth.
- To prevent the speaker from being damaged, do not place the speaker where it will be subjected to direct sunlight or excessive humidity.
- Do not place the speaker where it is liable to be knocked over or struck by falling objects. Stable placement will also ensure better sound performance.
- Placing the speaker on the carpet shall be avoided, as the carpet can result in feedback.
- Secure placement of the speaker is important to prevent the speaker from being damaged by vibration or displacement of the speaker.

- Mount on a wall or place on a shelf at an angle toward the front listening position for a fuller, warmer sound in a multi-channel system. Determine the best position and angle for the speakers by following the guidelines in the center's manual supplied with your amplifier.

- Mounting the speakers on a wall
- Mount the speakers on a wall by using the bracket provided on the back of the speaker. If space permits, use a soft wall or wall mount to place the speaker in the diagram, and follow the lines of the mounting bracket on the mounting surface.

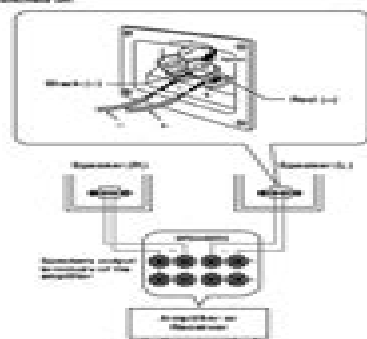

You can also use the screw holes on the back of the speaker to mount the speaker on a wall.
