Query Understanding for Search Engines Yi Chang, Hongbo

Deng, 2020-12-01 This book presents a systematic study of practices and theories for query understanding of search engines These studies can be categorized into three major classes The first class is to figure out what the searcher wants by extracting semantic meaning from the searcher's keywords such as query classification query tagging and query intent understanding The second class is to analyze search queries and then translate them into an enhanced query that can produce better search results such as query spelling correction or query rewriting The third class is to assist users in refining or suggesting queries in order to reduce users search effort and satisfy their information needs such as query auto completion and query suggestion Query understanding is a fundamental part of search engines It is responsible to precisely infer the intent of the query formulated by the search user to correct spelling errors in his/her query to reformulate the query to capture its intent more accurately and to guide the user in formulating a query with precise intent The book will be

invaluable to researchers and graduate students in computer or information science and specializing in information retrieval or web based systems as well as to researchers and programmers working on the development or improvement of products related to search engines
