are you a fish? If yes, I think it's a great name. If you are a human, I would discourage it.

Lin-Manuel Miranda Kat Harrison,2017-07-15 Born in New York City to Puerto Rican immigrant parents Lin Manuel
Miranda s creativity was influenced by the vibrant city He began writing his first musical while he was in college and has
since gone on to win a Pulitzer Prize two Grammys an Emmy three Tonys and many other accolades He is possibly the best
known name in modern theater Through lively text and bright photos readers will learn about Miranda s life education and
accomplishments as well as Hamilton New York City and Broadway Quotes from Miranda will allow readers a firsthand look
into the mind of America s most famous modern composer The Glossary helps readers understand vocabulary and Further
Reading will encourage deeper research **Cross-Language Relations in Composition** Bruce Horner,Min-Zhan Lu,Paul
Kei Matsuda,2010-05-09 Cross Language Relations in Composition brings together the foremost scholars in the fields of
composition second language writing education and literacy studies to address the limitations of the tacit English only policy
prevalent in composition pedagogy and research and to suggest changes for the benefit of writing students and instructors
throughout the United States Recognizing the growing linguistic diversity of students and faculty the ongoing changes in the
English language as a result of globalization and the increasingly blurred categories of native foreign and second language
English speakers editors Bruce Horner Min Zhan Lu and Paul Kei Matsuda have compiled a groundbreaking anthology of
essays that contest the dominance of English monolingualism in the study and teaching of composition and encourage the
pursuit of approaches that embrace multilingualism and cross language writing as the norm for teaching and research The
nine chapters comprising part 1 of the collection focus on the origins of the English only bias dominating U S composition
classes and present alternative methods of teaching and research that challenge this monolingualism In part 2 nine
composition teachers and scholars representing a variety of theoretical institutional and professional perspectives propose
new compelling and concrete ways to understand and teach composition to students of a global plural English a language
evolving in a multilingual world Drawing on recent theoretical work on genre complexity performance and identity as well as
postcolonialism Cross Language Relations in Composition offers a radically new approach to composition teaching and
research one that will prove invaluable to all who teach writing in today s multilingual college classroom Masters of
Mathematics Robert A. Nowlan,2017-05-13 The original title for this work was Mathematical Literacy What Is It and Why You

Need it The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It s not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics
