mental health problems do not receive support and there are often extensive waiting lists for Children and Young People's Mental Health Services which are increasingly overstretched. Unfortunately a large proportion of children with mental health disorders do not access evidence based treatment. Low intensity psychological interventions are now recommended by a number of national guidelines and in the UK are being implemented by a new workforce of Child Wellbeing Practitioners (CWP's). The Oxford Guide to Brief and Low Intensity Interventions for Children and Young People provides a comprehensive resource for therapists, services and training providers regarding the use, delivery and implementation of brief and low intensity psychological interventions within a child and adolescent context. It includes concise, focused chapters from leading experts in the field combining the most up to date research with practical considerations regarding the delivery of low intensity interventions. The first of its kind, this book will be an indispensable resource for practitioners, services and training courses internationally.

Managing Projects Well Stephen Bender, 2009-11-03. Few people realise how many projects people actually manage. Or how many of the theoretical approaches to Project Management do not meet the test of the real world. This intensive look at Project Management teaches people what they need to know to lead or be a member of a project team. Most Project Management texts deal predominantly with technical areas leaving readers ill prepared for the real world. *Managing Projects Well* looks closely at the behavioural aspects of project management and project team participation. *Managing Projects Well* shows what happens when your boss decides the project's schedule and budget and you have to work backwards to make things fit. How to communicate and present effectively within and beyond the team. How to cope when you do all the work and have to manage multiple projects and non-project time as well. How to organise people for success and develop ideal methods for team member motivation. How to change your own bad habits quickly. What to do when things go wrong. More traditional areas of project management such as planning, organising, leading

and controlling a project are also covered Stephen Bender has many years experience managing projects both small and large He specialises in teaching professional technical and clerical staff the techniques of workflow management and project management
