Unsteady Aerodynamics and Aeroelasticity of Turbomachines Torsten H. Fransson, 2012-12-06 Twenty one years have passed since the first symposium in this series was held in Paris 1976 Since then there have been meetings in Lausanne 1980 Cambridge 1984 Aachen 1987 Beijing 1989 Notre Dame 1991 and Fukuoka 1994 During this period a tremendous development in the field of unsteady aerodynamics and aeroelasticity in turbomachines has taken place As steady state flow conditions become better known and as blades in the turbomachine are constantly pushed towards lower weight and higher load and efficiency the importance of unsteady phenomena appear more clearly than The 8 Symposium was as the previous ones of high quality Furthermore it presented the audience with the latest developments in experimental numerical and theoretical research More papers than ever before were submitted to the conference As the organising committee wanted to preserve the uniqueness of the symposium by having single sessions and thus mingle speakers and audience with different backgrounds in this interdisciplinary field only a limited number of papers could be accepted 54 papers were accepted and presented at the meeting all of which are included in the present proceedings
