Surface Effects and Contact Mechanics X J. T. M. De Hosson, C. A. Brebbia, 2011 Contact mechanics and surface effects as well as their interaction are important in modern engineering The life and performance of structural components is affected by surface conditions such as wear corrosion and high cycle fatigue Surface treatments that address contact conditions can reduce costs by extending the life of components These are the subjects of a biennial conference first held in 1993 the papers from the latest of which are collected in this volume The book discusses Computer simulation Surface modification Surface treatments Surface problems in contact mechanics Contact mechanics Applications and case studies Indentation and hardness Thick and thin coatings Corrosion problems Nano characterisation Test methodology Multiscale experiments and modelling and Fracture fatigue and mechanics **Mathematical Modelling of Weld Phenomena: No. 4** H. Cerjak, 2024-11-01 Contains the papers presented at the fourth International Seminar Numerical Analysis of Weldability held in September 1997 at Schloss Seggau near Graz Austria Laser Additive Manufacturing Milan Brandt, 2016-09-01 Laser Additive Manufacturing Materials Design Technologies and Applications provides the latest information on this highly efficient method of layer based manufacturing using metals plastics or composite materials The technology is particularly suitable for the production of complex components with high precision for a range of industries including aerospace automotive and medical engineering This book provides a comprehensive review of the technology and its range of applications Part One looks at materials suitable for laser AM processes with Part Two discussing design strategies for AM Parts Three and Four review the most widely used AM technique powder bed fusion PBF and discuss other AM techniques such as directed energy deposition sheet lamination jetting techniques extrusion techniques and vat photopolymerization The final section explores the range of applications of laser AM Provides a comprehensive one volume overview of advances in laser additive manufacturing Presents detailed coverage of the latest techniques used for laser additive manufacturing Reviews both established and emerging areas of application *Computational Mechanics '95* S.N. Atluri, G. Yagawa, Thomas A. Cruse, 2013-11-11 AI in the earlier conferences Tokyo 1986 Atlanta 1988 Melbourne 1991 and Hong Kong 1992 the response to the call for presentations at ICES 95 in Hawaii has been overwhelming A very careful screening of the extended abstracts resulted in about 500 paper being accepted for presentation Out of these written versions of about 480 papers reached the conference secretariat in Atlanta in time for inclusion in these proceedings The topics covered at ICES 95 range over the broadest spectrum of computational engineering science The editors thank the international scientific committee for their advice and encouragement in making ICES 95 a successful scientific event Special thanks are expressed to the International Association for Boundary Elements Methods for hosting IABEM 95 in conjunction with ICES 95 The editors here express their deepest gratitude to Ms Stacy Morgan for her careful handling of a myriad of details of ICES 95 often times under severe time constraints The editors hope that the readers of this proceedings will find a kaleidoscopic view of
