Urban Tourism in the Global South

Christian M. Rogerson, Jayne M. Rogerson, 2021-07-13. This book examines and addresses the particular character of urban tourism occurring in the global South. It presents research essays on tourism in urban areas of South Africa, a country which is associated with big 5 nature tourism but where urban areas are also major tourism destinations. The book contextualizes urban tourism in South Africa as part of the other half of urban tourism, an overlooked but energetic scholarship which is emerging on urban places in the global South. The volume moves to present a collection of original material variously on national perspectives on urban tourism, following by a cluster of city level perspectives. The last three contributions turn to the role of tourism in small towns, the bottom rung in the urban settlement system. Issues of concern include gastronomic tourism, VFR travel, airports, climate change, Airbnb, and creative tourism. Finally, as COVID 19 is potentially a defining historical moment for urban tourism, the volume incorporates historical research perspectives in order to address the overwhelming present-mindedness of mainstream urban tourism writings. The book highlights the challenges and opportunities for tourism development in the environment of the urban global South and is relevant to scholars of both tourism and urban studies as well as researchers in development studies. **The Evolutions of Modernist Epic** Václav

Paris, 2021-01-07. Modernist epic is more interesting and more diverse than we have supposed. As a radical form of national fiction, it appeared in many parts of the world in the early twentieth century. Reading a selection of works from the United States, England, Ireland, Czechoslovakia, and Brazil, *The Evolutions of Modernist Epic* develops a comparative theory of this genre and its global development. That development, it argues, was bound up with new ideas about biological evolution. During the first decades of the twentieth century, a period known in the history of evolutionary science as the eclipse of Darwinism, evolution's significance was questioned, rethought, and ultimately confined to the Neo-Darwinist discourse with which we are familiar today. Epic fiction participated in and was shaped by this shift. Drawing on queer forms of sexuality to cultivate anti-heroic and non-progressive modes of telling national stories, the genre contested reductive and reactionary forms of social Darwinism. The book describes how, in doing so, the genre asks us to revisit our assumptions about ethnolinguistics and organic nationalism. It also models how the history of evolutionary thought can provide a new basis for comparing diverse modernisms and their peculiar nativisms. **Biodiversity Informatics: Building a Lifeboat for High Functionality Data to Decision Pipeline** Cang Hui, Nick Isaac, Quentin Groom, Vernon Visser, Sandra MacFadyen, 2024-03-06

Segregated Species Jules Skotnes-Brown, 2024-07-30 A timely history of the connections between science segregation and species in twentieth century South Africa Winner of the First Book Prize by the Royal Historical Society Throughout the twentieth century rural South Africa was dominated by systems of racial segregation and apartheid that brutally oppressed its Black population At the same time the countryside was defined by a related settler obsession the control of animals that farmers scientists and state officials considered pests Elephants rampaged on farmlands trampling fences crops and occasionally humans Grain eating birds flocked on plantations devouring harvests Bubonic plague crept across the veld in the bodies of burrowing and crop devouring rodents In Segregated Species Jules Skotnes Brown argues that racial segregation and pest control were closely connected in early twentieth century South Africa Strategies for the containment of pests were redeployed for the management of humans and vice versa Settlers blamed racialized populations for the abundance of pests and mobilized metaphors of pestilence to dehumanize them Even knowledge produced about pests was segregated into the binary categories of native and scientific Black South Africans critiqued such injustices and some circulated revolutionary rhetoric through images and metaphors of locusts Ultimately pest control practices played an important role in shaping colonial hierarchies of race and species and in mediating relationships among human groups Skotnes Brown demonstrates that the history of South Africa and colonial history generally cannot be fully understood without analyzing the treatment of both animals and humans
