Boshuizen, Rainer Bromme, Hans Gruber, 2006-04-11 About the Book Series The idea for the Book Series Innovation and Change in Professional Education ICPE was born in 1996 While working on another publication in this area we noticed that professional educators faced similar problems without even knowing from each other It was this observation that resulted in examining the possibilities for a new publication platform about professional education with input from different professions We wanted to develop a publication source that would bring together educators and researchers to exchange ideas and knowledge about theory research and professional practice But we were not only striving for a book series informing readers about important themes in the professions A second goal was to focus on processes of change and innovation We were

heavily involved in innovations going on in our institutions and were convinced that a better understanding was needed in a wide range of issues critically important to the future of professional education. It was our belief that scholarly publications about innovation processes may support fundamental change in professional education. ICPE reflects our view that professional education deserves such a publication platform. It aims to approach critical questions of educational innovations and to examine dynamics of educational change in various professional domains in the context of innovation processes. The books will include contributions from frontline practitioners, leading researchers or distinguished scholars in professional education, delivering reports of empirical or theoretical research, reviews, interpretations of evaluation studies or descriptions of innovative approaches.

The Bloomsbury Handbook of Technology Education David Gill, Dawne Irving-Bell, Matt McLain, David Wooff, 2023-04-20. The Bloomsbury Handbook of Technology Education draws together international perspectives on contemporary praxis in technology education from philosophy to empirical research. Through carefully commissioned chapters, leading authors explore the fundamentals of technology education, curriculum and pedagogy. Chapters discuss technology education as it can be experienced by children and young people inside and outside of the classroom across the world, as well as the importance of technology and the history and philosophical origins of technology education. Carefully curated, this is an innovative and exciting volume for students, teachers, teacher educators, researchers, lecturers and professors in technology education.

Making Math Stick David Costello, 2021-04-09. This remarkable book shows teachers how to stop working harder and start working smarter. It describes a shift from teach-test-move on to teach-connect-apply to optimize student learning. This valuable resource provides teachers with an understanding of simple, manageable and sustainable strategies to change their approach immediately. These strategies build on helping students retain math concepts so they can apply them in novel situations down the road. The focus is on supporting teachers in framing instruction so that students strengthen their understanding and can remember and apply learning. Making Math Stick is a game changer that champions durable learning for all students.

The Field Guide to Counseling Toward Solutions Linda Metcalf, 2008-03-10. The Field Guide to Counseling Toward Solutions. When it was first published in 1995, Linda Metcalf's book *Counseling Toward Solutions* became an instant bestseller. The book offered a new and positive program for changing individual behavior that helped K-12 students with their own

problems and gave themselves esteem in the process. Now *The Field Guide to Counseling Toward Solutions* offers school counselors, teachers, and administrators a complete program for changing the way that schools deal with a variety of issues. From an alternative school program that enlists the power of teacher mentors to the elementary program that involves the teacher, parent, and student in the counseling process, this book shows how to make change happen and how to make it last. The solution-focused approach helps everyone involved to begin their own change process by noticing when a problem does not occur rather than focusing on the problem or what caused it. It includes information targeted to specific age groups: elementary school students, middle schoolers, and adolescents, because each developmental stage requires a certain perspective and focus in order to collaborate and reach solutions. *The Field Guide to Counseling Toward Solutions* offers guidelines for developing a school-wide program that encompasses virtually all of the day-to-day programming that schools must provide for students. The book includes techniques and suggestions for training staff to become more solution-focused and student-centered. Working together with teams, teachers and parents so that the system creates and maintains change. Creating support groups for parents and students. Reducing special education referrals through solution-focused conversations. In this book, bestselling author and veteran school counselor Linda Metcalf offers more than a simple positive strategy or technique; she provides a way to think about school clients that can change interactions and guarantee success.

Enhancing the Modern Organization through Information Technology Professionals: Research, Studies, and Techniques Colomo-Palacios, Ricardo, 2012-12-31.
