IMPORTANT NOTE TO INSTRUCTORS

The 10th edition uses a building block approach to our coverage of consolidation in chapters 2 through 5. Chapter 2 introduces our coverage of consolidation in the most basic setting when the subsidiary is either created or purchased at an amount equal to the book value of the subsidiary's underlying net assets.

	Wholly Owned Subsidiary	Partially Owned Subsidiary	
Investment = Book Value	Chapter 2	Chapter 3	No Differential
Investment > Book Value	Chapter 4	Chapter 5	Differential
	No NCI Shareholders	NCI Shareholders	

Chapter 3 explains how the basic consolidation process changes when the parent company owns less than 100 percent of the subsidiary. Chapter 4 shows how the consolidation process differs when the parent company acquires the subsidiary for an amount greater (or less) than the book value of the subsidiary's net assets. Finally, Chapter 5 presents the most complex consolidation scenario (where the parent owns less than 100 percent of the subsidiary's outstanding voting stock and the acquisition price is not equal to the book value of the subsidiary's net assets). In order to facilitate this new approach, we emphasize that this edition includes elimination entries used in consolidation to facilitate the elimination of the investment in a subsidiary in two steps: (1) first the book value portion of the investment and income from the subsidiary are eliminated and (2) then the differential portion of the investment and income from subsidiary are eliminated with separate entries. We believe that this approach is more intuitive for students.

Kim, 2012-12-06 The usual view in a mixed economy is that some goods and services are produced privately and some such as transportation are produced publicly Private institutions such as households and entrepreneurs produce and consume goods and services in pursuing their parochial interests while the public sector attempts to broaden public interests More precisely the public sector constructs new transportation systems improves their capacities and regulates services and prices and the private sector chooses locations of production modes of transportation and routes of shipment At the same time all forms of transportation influence our lives and cause us concern for our environment health and safety Thus transportation is intimately woven into

the daily life of individuals and organizations in our society Because of its constant presence transportation is easy to overlook until it fails in some way Few would contend that private firms could or should construct an efficient transportation system in a mixed economic system Because the entire transportation system must be integrated and coordinated firms with the power to construct such a system would have considerable monopoly control **Australian National Bibliography**,1978 **Department of Energy Fiscal Year 1987 Budget** United States.
