Ragsdale, 2007 Accompanying CD ROMs have titles Student CD Microsoft Office Project Server 2003 Microsoft Office Project Professional 2003 **Rapid, Reproducible, and Robust Environmental Modeling for Decision Support: Worked Examples and Open-Source Software Tools** Jeremy White, Michael Fienen, Catherine Moore, Anneli Guthke, 2023-10-11 **Spreadsheet Modeling and Decision Analysis: a Practical Introduction to Management Science** Cliff Ragsdale, 2012 **Optimization Modeling with Spreadsheets** Kenneth R. Baker, 2012-01-10 Reflects the latest applied research and features state of the art software for building and solving spreadsheet optimization models Thoroughly updated to reflect the latest topical and technical advances in the field Optimization Modeling with Spreadsheets Second Edition continues to focus on solving real world optimization problems through the creation of mathematical models and the use of spreadsheets to represent and analyze those models Developed and extensively classroom tested by the author the book features a systematic approach that equips readers with the skills to apply optimization tools effectively without the need to rely on specialized algorithms This new edition uses the powerful software package Risk Solver Platform RSP for optimization including its Evolutionary Solver which employs many recently developed ideas for heuristic programming The author provides expanded coverage of integer programming and discusses linear and nonlinear programming using a systematic approach that emphasizes the use of spreadsheet based optimization tools The Second Edition also features Classifications for the various problem types providing the reader with a broad framework for building and recognizing optimization models Network models that allow for a more general form of mass balance A systematic introduction to Data Envelopment Analysis DEA The identification of qualitative patterns in order to meaningfully interpret linear programming solutions An introduction to stochastic programming and the use of RSP to solve problems of this type Additional examples exercises and cases have been included throughout allowing readers to test their comprehension of the material In addition a related website features Microsoft Office Excel files to accompany the figures and data sets in the book With its accessible and comprehensive presentation Optimization Modeling

with Spreadsheets Second Edition is an excellent book for courses on deterministic models optimization and spreadsheet modeling at the upper undergraduate and graduate levels The book can also serve as a reference for researchers practitioners and consultants working in business engineering operations research and management science

Mathematical Modeling Mark M. Meerschaert, 2007-06-18 Mathematical Modeling Third Edition is a general introduction to an increasingly crucial topic for today's mathematicians Unlike textbooks focused on one kind of mathematical model this book covers the broad spectrum of modeling problems from optimization to dynamical systems to stochastic processes Mathematical modeling is the link between mathematics and the rest of the world Meerschaert shows how to refine a question phrasing it in precise mathematical terms Then he encourages students to reverse the process translating the mathematical solution back into a comprehensible useful answer to the original question This textbook mirrors the process professionals must follow in solving complex problems Each chapter in this book is followed by a set of challenging exercises These exercises require significant effort on the part of the student as well as a certain amount of creativity Meerschaert did not invent the problems in this book they are real problems not designed to illustrate the use of any particular mathematical technique Meerschaert's emphasis on principles and general techniques offers students the mathematical background they need to model problems in a wide range of disciplines Increased support for instructors including MATLAB material New sections on time series analysis and diffusion models Additional problems with international focus such as whale and dolphin populations plus updated optimization problems

Mathematical Modeling Mark Meerschaert, 2013-01-28 The new edition of Mathematical Modeling the survey text of choice for mathematical modeling courses adds ample instructor support and online delivery for solutions manuals and software ancillaries From genetic engineering to hurricane prediction mathematical models guide much of the decision making in our society If the assumptions and methods underlying the modeling are flawed the outcome can be disastrously poor With mathematical modeling growing rapidly in so many scientific and technical disciplines Mathematical Modeling Fourth Edition provides a rigorous treatment of the subject The book explores a range of approaches including optimization models dynamic models and probability models Offers increased support for instructors including MATLAB material as well as other on line resources Features new sections on time series analysis and diffusion models Provides additional problems with international focus such as whale and dolphin populations plus updated optimization problems
