Pub 91-12 United States Army in Vietnam: Military Communications: A Test for Technology John D.

Bergen, 2018-09-30 In *Military Communications: A Test for Technology* John D. Bergen develops the thesis that burgeoning technology in communications faced a severe test in Vietnam. He analyzes the advantages and drawbacks of new communications systems and the effects these systems had on decision making and on command. In doing so he describes the difficulties that communications systems had in keeping pace with the information explosion and shows that command and control do not necessarily improve with enhanced communications. The book illustrates that the communications missions of getting the message through was not only critical to the success of combat operations but also as challenging as combat itself. Bergens clear understanding and description of these issues make this a valuable work for those responsible for the future success of command control communications and intelligence. *Getting the message through: A Branch History of the U.S. Army Signal Corps* Rebecca Robbins Raines, 1996

Getting the Message Through the companion volume to Rebecca Robbins Raines' *Signal Corps* traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War through its stages of growth and change to its service in Operation DESERT SHIELD, DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be *sine qua non* to modern warfare. As Raines ably shows, the Signal Corps once considered by some Army officers to be of little or no military value and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch. *Publications of the U.S. Army Center of Military History* Center of Military History, 1997

Pure Logistics George Cyrus Thorpe, 2022-06-14 We place a premium on forward looking military thought but a reflective look at literature from the past can also be useful, especially when that literature marks the intellectual heritage of American planning for national defense. At the Industrial College of the Armed Forces one of the accepted classics of military literature is *Pure Logistics: The Science of War Preparation* written by Lieutenant Colonel George C. Thorpe of the United States Marine Corps and published originally in 1917. Stanley L. Falk tells us *Pure Logistics* stands out as a milestone between the seminal writings of Baron de Jomini published one hundred years before and later treatises examining logistics following World War II. Thorpe's observations and recommendations in *Pure Logistics* have held up over time even in the face of the technological advances of nearly seventy years. His call for preparation in peacetime to accelerate defense industrial production in the event of war is as valid today as it was in 1917. **Military Communications** John D. Bergen, 1986 In
