

Unpacking the machine

Place the machine on the table with the little mark on top of the cover facing you. Pull the locking lips from the handle, lift off the cover and put it aside. Remove the extension table and the foot control. Lift the accessory box somewhat and slide it to the left from the machine.

In order to protect the machine during transport it has undergone an anti-corrosive treatment. Therefore wipe the machine clean before you start sewing. Be especially careful when cleaning the throat plate and the space round the needle. First test sew on a scrap of fabric.

Putting the machine away

Pull the plugs out of the wall outlet and the socket of the machine. Wind the leads around your hand, starting at the foot control and push them in under the foot plate. Place the control in its compartment, with the wider end upwards. The bottom of the foot control should be turned towards the machine.

Lower the presser foot. Make sure that all accessories are correctly placed in the box. Slide the accessory box into place and put the extension table into the box. Lift the handle and put on the cover. Make sure that the locking lips are inserted into the notches of the handle.
