Freedman, 2014-05-16 It s called consciousness raising CR Asking questions about our experiences and sharing insights and analyses with others can be the basis for informed activism for positive social change CR provided the entry point for feminists who shaped the women s liberation movement in the late 1960s and 1970s and is now being revitalized across class race and geography in face to face groups and on the internet Reclaiming the Feminist Vision traces the origins principles and impact of consciousness raising reveals how the process migrated to other settings sometimes maintaining the original political intent and sometimes diluting it The book calls for the renewal of the practice to help feminists regain their voices and their power in shaping social movement history *The Great Starvation Experiment* Todd Tucker, 2007 Reprint Originally published New York Free Press c2006

Global Governance, Economy and Law Errol Mendes, Ozay Mehmet, 2003-02-27 This book provides a critical examination of the most important institutions of global governance in the world today Drawing on history political science law and economics the authors examine institutions such as the United Nations the World Trade Organization WTO the International Monetary Fund IMF the World Bank and also the global pri Engines of the Imagination Jonathan Sawday, 2007-11-30 At what point did machines and technology begin to have an impact on the cultural consciousness and imagination of Europe How was this reflected through the art and literature of the time Was technology a sign of the fall of

humanity from its original state of innocence or a sign of human progress and mastery over the natural world In his characteristically lucid and captivating style Jonathan Sawday investigates these questions and more by engaging with the poetry philosophy art and engineering of the period to find the lost world of the machine in the pre industrial culture of the European Renaissance The aesthetic and intellectual dimension of these machines appealed to familiar figures such as Shakespeare Francis Bacon Montaigne and Leonardo da Vinci as well as to a host of lesser known writers and artists in the sixteenth and seventeenth centuries This intellectual engagement with machines in the European Renaissance gave rise to new attitudes towards gender work and labour and even fostered the new sciences of artificial life and reason which would be pursued by figures such as Descartes Hobbes and Leibniz in the seventeenth century Writers philosophers and artists had mixed and often conflicting reactions to technology reflecting a paradoxical attitude between modern progress and traditional values Underpinning the enthusiastic creation of a machine driven world then were stories of loss and catastrophe These contradictory attitudes are part of the legacy of the European Renaissance just as much as the plays of Shakespeare or the poetry of John Milton And this historical legacy helps to explain many of our own attitudes towards the technology that surrounds us sustains us and sometimes perplexes us in the modern world

Canada and the Second World War

Geoffrey Hayes, Mike Bechthold, Matt Symes, 2013-02-01 Terry Copp's tireless teaching research and writing has challenged generations of Canadian veterans teachers and students to discover an informed memory of their country's role in the Second World War This collection drawn from the work of Terry's colleagues and former students considers Canada and the Second World War from a wealth of perspectives Social cultural and military historians address topics under five headings The Home Front The War of the Scientists The Mediterranean Theatre Normandy Northwest Europe and The Aftermath The questions considered are varied and provocative How did Canadian youth and First Nations peoples understand their wartime role What position did a Canadian scientist play in the Allied victory and in the peace Were veterans of the Mediterranean justified in thinking theirs was the neglected theatre How did the Canadians in Normandy overcome their opponents but not their historians Why was a Cambridge scholar attached to First Canadian Army to protect monuments And why did Canadians come to commemorate the Second World War in much the same way they commemorated the First The study of Canada in the Second World War continues to challenge confound and surprise In the questions it poses the evidence it considers and the conclusions it draws this important collection says much about the lasting influence of the work of Terry Copp Foreword by John Cleghorn
