services using Microsoft's Windows Server for on premises work and Azure AppFabric for hosting workflows in the cloud. With the concept of cloud computing using Windows Azure and the maturity of Windows Server technology, workflow services can be hosted with first class service monitoring with less overhead from a developer's perspective. Building workflows in a declarative fashion and hosting them as services is a natural way for building business logic that is tiered away from running applications that subscribe to them, therefore providing flexibility for when business processes change. In Pro WF 4.5, author Bayer White walks you as the developer through the steps and explains the concepts of declaratively modeling domain specific business processes that can be hosted and exposed as services either on premise or as cloud services within Windows Azure. Gives you a practical knowledge of WF 4.5, Windows Server and Azure AppFabric. Builds a foundation for building workflows that can be exposed on premise or in the cloud. Shows how to use the tools available for managing workflow services.

Node.js for .NET Developers David Gaynes, 2015. Build scalable high traffic websites and web applications with Node.js. For many .NET programmers, Node.js represents a new way to build high traffic websites and applications. Now there's a practical, concise introduction to Node.js specifically for Microsoft developers. David Gaynes guides you through the entire Node.js development process. Using Microsoft Visual Studio examples, he addresses everything from setting up servers and authorization through delivering rich CSS pages packed with graphics and data driven content. Gaynes clearly explains Node.js's async model, coding approach, request response paradigm, site structure, data management, security and more. This quick guide will help you apply your hard won .NET skills to Node.js. Expert guidance showing you how to choose, organize and configure the tools you need to build Node.js solutions in Visual Studio. Apply JavaScript coding practices that help you avoid problems in Node.js. Work with callback functions and the Node.js asynchronous programming model. Set up a Node.js project and use what you know about MVVM and MVC patterns. Control the entire Node.js request response life cycle. Establish site structure, routes and access to static resources. Manage data through caching, forms, IO techniques and file uploads. Integrate data from Microsoft SQL Server and other databases. Use Passport to integrate simple, flexible authentication.
