Solubility Curve Practice Problems Worksheet 1

You'll notice that for most substances, solubility increases as temperature increases. As discussed earlier in solutions involving liquids and solids typically more solute can be dissolved at higher temperatures. Can you find any exceptions on the graph? _____

Here's an example of how to read the graph. Find the curve for KClO_3 .

At 30°C approximately 10g of KClO_3 will dissolve in 100g of water. If the temperature is increased to 80°C , approximately _____ of the substance will dissolve in 100g (or 100mL) of water.

Directions: Use the graph to answer the following questions. REMEMBER UNITS!

1) What mass of solute will dissolve in 100mL of water at the following temperatures?

processes the use of solvent extraction in analytical applications and waste re Analytical Chemistry Gary D. Christian,Purnendu K. Dasgupta,Kevin A. Schug,2013-10-07 With the 7th Edition of Analytical Chemistry renowned chemists Purnendu Sandy Dasgupta and Kevin Schug both of the University of Texas Arlington join the author team The new edition focuses on more in depth coverage of the principles and techniques of quantitative analysis and instrumental analysis aka Analytical Chemistry The goal of the text is to provide a foundation of the analytical process tools and computational methods and resources and to illustrate with problems that bring realism to the practice and importance of analytical chemistry It is designed for undergraduate college students majoring in chemistry and in fields related to chemistry Technical Paper,1933 **Fundamentals of Electrochemical Corrosion** Ele Eugene Stansbury,Robert Angus Buchanan,2000-01-01 Covering the essential aspects of the corrosion behavior of metals in aqueous environments this book is designed with the flexibility needed for use in courses for upper level undergraduate and graduate students for concentrated courses in industry for individual study and as a reference book **Calculations for GCSE Chemistry** Eileen Ramsden,2002 This fully revised edition is in line with the revised 2002 National Curriculum requirements and focuses on quantitative chemistry in science Written to match all major GCSE specifications the text covers all types of numerical questions from first principles For each topic a concise treatment of the underlying theory is followed by problems grouped into three sections of increasing difficulty Calculations based on round number molar masses are included to enable students to concentrate on the chemical basis of the problems rather than arithmetical manipulation Chirality in Industry II A. N. Collins,Gary Sheldrake,J. Crosby,1998-02-04 This second volume of Chirality in Industry contains new case histories from a wide range of contributors from industry or with strong industrial connections While it is intended that the new volume will stand on its own Volumes I and II taken together present an up to date and comprehensive picture of the technologies required to produce optically active compounds on a multi kilogramme to high tonnage scale as well as illustrating the breadth of application of these technologies the pharmaceuticals agrochemicals electronics food flavour and fragrance industries are all represented Chirality in Industry II All new case histories Unique industrial perspective on chiral technology Emphasis on scale up and process development Comparison of biocatalysis asymmetric synthesis and classical resolution approaches The chiral infrastructure is now largely in place and there is no reason why large scale production should not be possible for even moderately priced single enantiomer products The successful industrial application of chiral chemistry depends on the integration of a range of supporting technologies and there are many examples in this volume of how widely the industrial practitioner must cast the net to achieve practical production methods As with Volume I this new volume is of particular interest to those professionally involved in the scale up processes for single enantiomers However students and researchers involved in a more academic pursuit of optical activity will also benefit from some of the facets of large scale thinking An economic solution is still most likely to be a simple elegant solution **Chemistry** John A.
