Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj i ek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and i ek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe's destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the

crushing neo colonial situation i ek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and i ek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and i ek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality

Hussein Rassool, Mugheera M. Luqman, 2022-08-19 **Foundations of Islamic Psychology From Classical Scholars to Contemporary Thinkers** examines the history of Islamic psychology from the Islamic Golden age through the early 21st century giving a thorough look into Islamic psychology's origins, Islamic philosophy and theology and key developments in Islamic psychology. In tracing psychology from its origins in early civilisations, ancient philosophy and religions to the modern discipline of psychology, this book integrates overarching psychological principles and ideas that have shaped the global history of Islamic psychology. It examines the legacy of psychology from an Islamic perspective, looking at the contributions of early Islamic classical scholars and contemporary psychologists and to introduce how the history of Islamic philosophy and sciences has contributed to the development of classical and modern Islamic psychology from its founding to the present. With each chapter covering a key thinker or moment and also covering the globalisation of psychology, the Islamisation of knowledge and the decolonisation of psychology, the work critically evaluates the effects of the globalisation of psychology and its lasting impact on indigenous culture. This book aims to engage and inspire students taking undergraduate and graduate courses on Islamic psychology to recognise the power of history in the academic studies of Islamic psychology to connect history to the present and the future and to think critically. It is also ideal reading for researchers and those undertaking continuing professional development in Islamic psychology, psychotherapy and counselling. The ^A Struggle

for Freedom from Fear Alison Brysk, 2018-08-01 How can we understand and contest the global wave of violence against women? In this book, Alison Brysk shows that gender violence across countries tends to change as countries develop and liberalize but not in the ways that we might predict. She shows how liberalizing authoritarian countries and transitional democracies may experience more shifting patterns and greater levels of violence than less developed and democratic countries due to changes and uncertainties in economic and political structures. While a combination of international action, law, public policy, civil society mobilization and changes in social values work to decrease gender violence, Brysk assesses the potential limits and balance of these measures. **Handbook of Research on Leading Higher Education**

Transformation With Social Justice, Equity, and Inclusion Reneau, Clint-Michael, Villarreal, Mary Ann, 2021-06-25 With the resurgence of race-related incidents nationally and on college campuses in recent years, acts of overt racism, hate crimes, controversies over free speech and violence continue to impact institutions of higher education. Such incidents may impact the overall campus racial climate and result in a racial crisis which is marked by extreme tension and instability. How institutional leaders and the campus community respond to a racial crisis along with the racial literacy demands of the campus leaders can have as much of an effect as the crisis itself. As such, 21st-century university leaders must become more emotionally intelligent and responsive to emergent campus issues. Improving campus climate is hard and to achieve notable gains, higher education professionals will have to reimagine how they approach this work with equity-influenced practices and transformative leadership. **The Handbook of Research on Leading Higher Education Transformation With Social Justice**

The Vanishing Tradition Paul Gottfried,2020-07-15 This anthology provides a timely critical overview of the American conservative movement The contributors take on subjects that other commentators have either not noticed or have been fearful to discuss In particular this collection of searing essays hits hard at blatant cult of celebrity and intolerance of dissent that has come to characterize the conservative movement in this country As The Vanishing Tradition shows the conservative movement has not often retrieved its wounded instead dispatching them in order to please its friendly opposition and to prove its moderateness The movement has also been open to the influence of demanding sponsors who have pushed it in sometimes bizarre directions Finally the essayists here highlight the movement s appeal to permanent values as a truly risible gesture given how arduously its celebrities have worked to catch up with the Left on social issues This no holds barred critical examination of American conservatism opens debates and seeks controversy

The Right to Research Kate Reed,Marcia C. Schenck,2023-01-15 Refugees and displaced people rarely figure as historical actors and almost never as historical narrators We often assume a person residing in a refugee camp lacking funding training social networks and other material resources that enable the research and writing of academic history cannot be a historian because a historian cannot be a person residing in a refugee camp The Right to Research disrupts this tautology by featuring nine works by refugee and host community researchers from across Africa Europe and the Middle East Identifying the intrinsic challenges of making space for diverse voices within a research framework and infrastructure that is inherently unequal this edited volume offers a critical reflection on what history means who narrates it and what happens when those long excluded from authorship bring their knowledge and perspectives to bear Chapters address topics such as education in Kakuma Refugee Camp the political power of hip hop in Rwanda women migrants to Yemen and the development of photojournalism in Kurdistan Exploring what it means to become a researcher The Right to Research understands historical scholarship as an ongoing conversation one in which we all have a right to participate

P Wong,Lok Sang Ho,Richard Gregory Cowden,Claude-Hélène Mayer,Fan Yang,2023-10-24 New developments in positive psychology have evolved into the 2nd and 3rd waves going beyond the individual and positive focus towards complex systems multi cultures and the existential positive psychology of transcending suffering The present project aims at developing a general theory of well being that integrates all the above changes as the new frontier of positive psychology At a time when humanity is threatened by all kinds of existential crises from climate change to nuclear war from ideological polarization to a widening income gap we need to develop a big picture theoretical framework showing that happiness is not just for those living in peace and prosperity but also for those struggling in dire poverty and war ravaged countries like Ukraine not just for the self but also for others not just for the present but also for future generations This broader approach towards wellbeing opens up new vistas for research and interventions
