Using patterns that demonstrate best practices and consistent approaches to design detailing, this book teaches why detailing is important, what factors shape detailing issues and how to detail a building that meets or exceeds performance requirements. Extensive illustrations demonstrate how to design building details that will not leak water or air, will control the flow of heat and water vapor, will adjust to all kinds of movement and will be easy to construct. This fourth edition has been updated to conform to the latest International Building Codes and International Energy Conservation Code requirements and incorporates current knowledge about new material and construction technology including expanded patterns for sustainability, high performance architecture and resilience. Examples using panelized or modularized prefabricated building assemblies. Complex case studies demonstrating the detailing design process for energy efficient structures.
