Kimball,2012-12-06 Citrus juices are the most common among the fruit juices around the world and constitute a major
portion of the food industry Even though juice processing technology has been around for many years interest in historical
and modern innovations and applications is widespread New juice enterprises are springing up constantly all over the world
Old enterprises are constantly undergoing change growth and development The Internet has expanded the reach of many not
only for information but for marketing and production alterations The World Wide Web has made the wide world one
Computer technology alone is growing faster than the oranges on the trees With these multifaceted changes a need has
emerged for an update to the first edition of Citrus Processing The second edition of Citrus Processing has expanded its
scope beyond the quality control theme of the first edition I have used a more holistic approach to the subject of citrus
processing Those using this text in the classroom will find it more comprehensive in its treatment of the subject The first
edition targeted the industrial technologist The second edition approaches citrus processing as a complete subject assuming
an audience interested in learning from the ground up This new approach should be particularly appealing to those
unfamiliar with the industry Even so experienced industrialists will find the information contained here contemporary
futuristic and fundamental
