Flanagan,Alexander N. Christakis,2021-12-01 The Talking Point is all about how people learn within groups People can be much smarter than crowds if you measure smart as decision making speed Crowds can be much wiser than individuals if you measure wisdom by depth of understanding It is possible to understand a great deal of information yet or maybe because of this you can also be slow to make decisions If rushed crowds will make poor decisions in spite of their

wisdom So to get good group decisions on a time scale that will keep pace with policy development needs and social necessities groups have to be supported so that their decision making process can be accelerated Much has been said and written about this problem over the years It is dangerous to have the power of groups without the wisdom of groups and it is tragic to have the wisdom of groups without the power of groups The Talking Point presents a meeting point for the wisdom and power of groups through the use of Structured Dialogic Design With hopeful intentions as a culture we have poisoned the well just when we need it most We have touted design charrettes and stakeholder processes as engagement vehicles and then ignored marginalized or corrupted the very input that we swore to hold as sacred This has created a myth that large scale collaboration is not possible and the myth has led to considerable disillusionment among would be participants and could be sponsors Structured Dialogic Design seeks to bust the myth about our limited capabilities to sustain boundary spanning collaboration To bust this myth Structured Dialogic Design needs to usher in a new wave of collaborative planning Scholars have identified the Structured Dialogic Design methodology as the cutting edge of third phase science where the reality of a situation embraces interactions between objective findings and subjective intentions The Talking Point provides a window for observing how Structured Dialogic Design has been put into practice and paints a panorama of the issues that confront complex social system design This book is itself a bridge between scholarship and practice written to be accessible yet anchored to major themes in cognitive psychology information systems social systems and models of group learning The book is an invitation for transformational leaders and those who support transformational leaders to pick up a new tool in the essential quest to put our nation and our world back on track toward sustainable futures The Talking Point is a fresh source of water in a world that is thirsty for new ways of solving complex problems *Complex Adaptive Leadership* Nick Obolensky, 2024-11-01 Since its publication *Complex Adaptive Leadership* has become a Gower bestseller that has been taught in corporate leadership programmes business schools and universities around the world to high acclaim In this updated paperback edition Nick Obolensky argues that leadership should not be something only exercised by nominated leaders It is a complex dynamic process involving all those engaged in a particular enterprise The theoretical background to this lies in complexity science and chaos theory spoken and written about in the context of leadership for the last 20 years but still little understood We all seem intuitively to know leadership isn't what it used to be but we still cling to old assumptions which look anachronistic in changing and challenging times Nick Obolensky has practised researched and taught leadership in the public private and voluntary sectors In this exciting book he brings together his knowledge of theory his own experience and the results of 19 years of research involving 2 500 executives in 40 countries around the world The main conclusion from that research is that the more complex things become the less traditional directive leadership is needed Those operating in the real world nonetheless need ways of coping The book is focused on helping practitioners struggling to interpret and react to increasingly VUCA Volatile Uncertain Complex Ambiguous times The book will

particularly appeal to practitioners wishing to improve their leadership effectiveness as well as for students and researchers in the field of leadership
