Finch,Guillermo Aranda-Mena,2019-10-02 Emotions in the workplace have until recently been seen simply as a distraction We often think of work as rational logical and non emotional But organisations are waking up to the key role of emotions and affect at work Emotions influence how we make decisions how we relate with one another and how we make sense of our surroundings Whilst organisations are slowly embracing the pivotal role of emotions designers and managers of workplaces have been struggling to keep up New insights from hard sciences such as neuropsychology are presenting a radically different interpretation of emotions Yet workplace designers and facilities managers still rely on measuring non specific states such as satisfaction and stress In this book we attempt to capture modern day interpretations of emotion looking at emotion in terms of transactions and processes rather than simple cause and effect We entertain the idea of an emotionally

intelligent building as an alternative to the much hyped intelligent building The assertion is that we should create environments that are emotionally intelligent Rather than focusing on the aptitudes or shortcomings of individuals at work we should place closer attention on the office environment It s not that we are emotionally disabled it s the environment that disables us The ability of you and me to interpret control and express emotions may not simply be a result of our own make up A radically different outlook considers how our workspace and workplace debilitates or enables our emotional understanding In the modern workplace there are many innovations that can undermine our emotional intelligence such poorly implemented hot desking or lean environments Contrariwise there are key innovations such as Activity Based Working ABW that have the potential to enhance our emotional state Through a series of unique case studies from around the world we investigate key concepts that can be used by designers and facilities managers alike No longer should designers be asked to incorporate emotional elements as intangible un costed add ons This book provides a shot in the arm for workplace design professionals pointing to a new way of thinking based on the emotional intelligence of the workplace

**The Addiction Recovery Handbook** Richard W. Clark,2020-09-28 What Richard Clark presents in The Addiction Recovery Handbook Understanding Addiction and Culture is long overdue Since 1939 Bill Wilson s important and influential books Alcoholics Anonymous and AA s Twelve Steps and Twelve Traditions have helped millions of people struggling with addiction to recover In more than 80 years since then a lot has changed the definition of addiction its demographics social attitudes to addiction politics religious influence treatment modalities and the epidemiology of the illness These have taken tolls on our modern network of relationships and treatment that culture and community now depend upon The Addiction Recovery Handbook examines the changing historical views of addiction outlines how this culture developed its contemporary perceptions and values and how society contributes to this growing problem Richard Clark proposes AA s traditional religious model of God s help and forgiveness can no longer address the needs of a diverse and largely irreligious society where atheism is becoming mainstream His updated analysis of the traditional AA approach proposes that self

understanding and awareness through knowledge and education psychology and compassion be the significant components of any recovery framework This will guide both caregivers and addicts to develop expertise regarding more successful treatment and recovery protocols This would be in a supportive environment of self knowledge and mutual respect whether theist or atheist All concerned will acquire the ability to live a spiritual life which is clearly defined The Addiction Recovery Handbook is an interesting and readable book and is intended for everyone addicts medical professionals counsellors therapists clients sponsors social workers family members partners friends employers every stakeholder in a healthy non judgmental society that cares about the wellbeing of all its members      **Make: Volume 85** Dale Dougherty,2023-05-02 In this issue s cover story we go inside how an FX team built a working R C prop of the famous disembodied hand Thing from Netflix s Wednesday and how you can bring your own props and robots to life with channelmixing telemetry and on the fly programming using OpenTX for your R C transmitter Then we dive into exciting DIY music projects starting with the burgeoning synth DIY SDIY scene Get the ins and outs of how to kit out your modular synth setup then build your own simple synth and learn what makes it squeal with the Mt Brighton Avalanche Oscillator Or go low tech with a great sounding Soda Bottle Marimba you can build for pennies or 3D print your own speakers and instruments Plus 33 projects and skills including Program animations for mechanical flip dot displays Sharpen your knife skills by carving a chain from a tree branch Etch custom designs into brass using salt water and electricity Carve two different universal clamps for your CNC projects Learn tips and techniques for getting glass like 3D prints from clear filaments And much more      **Affective Computing and Intelligent Interaction** Ana Paiva,Rui Prada,Rosalind W.
