Aaron Chase,2014-03-04 Why would I want to use the manual mode if my camera can automatically adjust these settings for me Well for the same reason that professional photographers use manual mode Control You see when you let your camera automatically choose it s exposure settings based on the information it s sensors are giving it your camera will strive to expose the image as close to what the human eye would perceive the scene However the problem with this is not only that it sometimes gets it wrong but also that the way the eye might see a scene is many if not most times not the most beautiful interesting way to capture that scene For example if you were taking a picture of the sun at sunset your camera might automatically want to expose the image rather darkly attempting to make both sun and landscape are properly exposed Your camera does not realize that a much more interesting picture could be created if you exposed the image so that the landscape became the star of your photograph exposing it so that it being the breathtaking landscape is well lit rich and interesting Or you could use your camera s automatic setting and end up with the landscape being a too dark uninteresting blob of dirt Another reason to use your DSLR s manual setting is that of style No matter whether photography is your hobby or you are looking to become a serious photographer you will eventually develop a style that you want your photography to look like Maybe that style is a dark and moody style or maybe it is a bright and cheerful style Regardless with manual you can control how your images feel and create a distinct and beautiful style in your images Whereas if you use the automatic setting this ability is taken away from you and you will end up looking like the hundreds of thousands of other digital camera user s out there Nikon D5500 For Dummies Julie Adair King,2015-05-04 Jump into photography and the Nikon D5500 with this easy to read guide Armed with the new Nikon D5500 digital camera but don t know where to start No problem Nikon D5500 For Dummies is the definitive guide to helping newbies and aspiring photographers get up and running with this great DSLR camera You ll dive right in to using your camera in automatic mode then build on this basic knowledge by learning about manual settings exposure and more advanced techniques that will have you taking great photographs in a

flash This easy to use guide combines the tips and tricks of a basic photography course with camera specific guidance that will help you with the Nikon D5500's basic settings manual mode WiFi connectivity touchscreen interface and so much more The Nikon D5500 is the perfect camera for a connected generation it offers the features of a DSLR with the connectivity of a smart phone and but its high quality photos go well beyond what you can snap from your phone With this fun guide you'll take your photography to the next level Get started with a roadmap of the Nikon D5500 controls and options for taking photos in automatic mode with preset shooting modes or in manual mode Take a crash course on exposure and how to control it along with lens and flash options of your camera Find out how to adjust color and focus use manual settings and take photos in scene mode and priority mode Pull all your newfound photography chops together to take better portraits action shots night photos and outdoor shots Nikon D5500 For Dummies is the guide you need to get up and running quickly and easily with your great new DSLR camera
