The behavior and sensory biology of elasmobranch fishes: an anthology in memory of Donald Richard Nelson Timothy C. Tricas,Samuel H. Gruber,2013-06-29 The elasmobranch fishes include the living sharks skates and rays that are important members of nearly all marine ecosystems Their large size secretive behavior and wide ranging habits make them difficult to observe in the field or to maintain in captivity Consequently little is known about their natural behavior and how it is mediated by their sensory systems This volume is dedicated to the scientific contributions and memory of Donald Nelson a pioneer in the study of shark behavior sensory biology and remote instrumentation The two opening papers review Don Nelson s unique scientific accomplishments

and provide insight into his strong bias towards study of animals in the field These are followed by 14 scientific papers on elasmobranch behavior sensory biology and current monitoring technologies The papers on elasmobranch sensory biology and behavior address questions on hearing the lateral line electroreception the brain orientation behavior chemical irritants feeding and reproduction The latter section of the volume presents papers on conventional tagging techniques ultrasonic telemetry physiological telemetry remote monitoring techniques archival tagging and satellite tagging The intent of this volume is to familiarize both new and established scientists with the sensory biology and behavior of sharks and rays and to encourage further behavioral research on these animals in their natural environment Field Identification Guide to the Sharks and Rays of the Mediterranean and Black Sea Fabrizio Serena, 2005-01-01 This volume presents a fully illustrated field guide for the identification of the sharks and rays most relevant to the fisheries of the Mediterranean and Black Sea An extensive literature review was carried out for the preparation of this document A total of 49 sharks 34 batoids and 1 chimaera are fully treated The presence of 5 sharks and 2 batoids included in this field guide need however to be confirmed The guide includes sections on technical terms and measurements for sharks and batoids and fully illustrated keys to those orders and families that occur in the region Each species account includes at least one annotated illustration of the species highlighting its relevant identification characters basic information on nomenclature synonyms and possible misidentifications FAO common names basic information on size habitat and biology distribution importance to fisheries and conservation and exploitation status **Bio-inspired Innovation and National Security** ,
