The M1917 Revolver formally United States Revolver Caliber 45 M1917 was a U S six shot revolver of 45 ACP caliber It was adopted by the U S Army in 1917 to supplement the standard M1911 45 ACP semi automatic pistol during World War I After it was primarily used by secondary and non deployed troops There were two variations of the M1917 one from Colt and one from Smith Wesson The Colt M1917 Revolver was essentially the same as the M1909 with a cylinder bored to take the 45 ACP cartridge and the half moon clips to hold the rimless cartridges in position In early Colt production revolvers attempting to fire the 45 ACP without the half moon clips was unreliable at best as the cartridge could slip forward into the cylinder and away from the firing pin Later production Colt M1917 revolvers had headspacing machined into the cylinder chambers just as the Smith Wesson M1917 revolvers had from the start The Smith Wesson Model 1917 was essentially an adaptation of that company s Second Model 44 Hand Ejector chambered instead for 45 ACP employing a shortened cylinder allowing for use of half moon clips and a lanyard ring on the butt of the frame After the First World War M1917s became popular on the civilian and police market Created in 1941 this field manual reveals a great deal about the M1917 s design and capabilities Intended as a manual for those charged with operation and maintenance it details many aspects of the gun assembly accessories and target exercises Originally labeled restricted this manual was declassified long ago and is here reprinted in book form Care has been taken to preserve the integrity of the text *Handbook of the Smith & Wesson Semi-automatic Light Rifle, Caliber-9 MM.
