

Validity Coefficient	Information
$0.90 \leq r_{xy} \leq 1.00$	Very high validity (very good)
$0.70 \leq r_{xy} \leq 0.90$	High validity (good)
$0.40 \leq r_{xy} \leq 0.70$	Medium validity (enough)
$0.20 \leq r_{xy} \leq 0.40$	Low validity (less)
$0.00 \leq r_{xy} \leq 0.20$	Very low validity (very lacking)
$r_{xy} \leq 0.00$	Invalid

From the table 1.2 classification interpretation validity coefficient, obtained 20 items in the instrument variable X (method dulohupa) the validity coefficient. From the results of the analysis of 20 instrument items of variable X, 14 valid instrument items and 6 invalid instrument items were obtained. This is because the instrument item is said to be valid if $r_{count} > r_{table}$, and invalid if $r_{count} < r_{table}$.

Validasi bag test results and Y variable (community empowerment)

The category of instrument validity refers to the classification of validity presented by Riyani et al[14] quoted in the UPI Journal on page 6 as well as in the second place classification of the interpretation of the validity coefficient, 10 assessment items were obtained in the variable Y instrument (community empowerment) the coefficient of validity. From the results of the analysis,

obtained 10 items of assessment of community empowerment it is valid, in other words all items are valid. The validity of the validity of the 10 assessment items is declared valid. Because matter or assessment items considered valid if $r_{count} > r_{table}$, and invalid if $r_{count} < r_{table}$.

3.2. Reliability Test Results

As in the validity test for variable X (dulohupa method), the reliability test is also done, such as instrument variable Y (community empowerment). The results of the reliability testing of the two variables are as follows.

Variable Reliability Test Results X (dulohupa method)

Referring to the question reliability classification according to Guilford [15] as quoted in the UPI journal as follows.

Validity In Interpretation:

Validity in Interpretation Eric Donald Hirsch, 1967-01-01 The object of interpretation is textual meaning in and for itself and may be called the meaning of the text The object of criticism on the other hand is that meaning in its bearing on something else standards of value present concerns etc and this object may therefore may be called the significance of the text If textual meaning itself could change contemporary readers would lack a basis for agreement or disagreement No one would bother seriously to discuss such a protean object The interpreter has to distinguish what a text implies from what it does not imply he must give the text its full due but he must also preserve norms and limits For hermeneutic theory the problem is to find a principle for judging whether various possible implications should or should not be admitted By classifying the text as belonging to a particular genre the interpreter automatically posits a general horizon for its meaning The genre provides a sense of the whole a notion of typical meaning components Thus before we interpret a text we often classify it as casual conversation lyric poem military command scientific prose occasional verse novel epic etc The interpreter's job is to specify the text's horizon as far as he is able and this means ultimately that he must familiarize himself with the typical meanings of the author's mental and experiential world Hermeneutics must stress the reconstruction of the author's aims and attitudes in order to evolve guides and norms for construing the meaning of the text Ambiguity or for that matter vagueness is not the same as indeterminateness This is the crux of the issue To say that verbal meaning is determinate is not to exclude complexities of meaning but only to insist that a text's meaning is what it is and not a hundred other things Taken in this sense a vague or ambiguous text is just as determinate as a logical proposition it means what it means and nothing else

Frick,Christopher T. Barry,Randy W. Kamphaus,2009-12-12 Psychologists offer an increasing variety of services to the public Among these services psychological assessment of personality and behavior continues to be a central activity One main reason is that other mental health professionals often do not possess a high level of competence in this area And when dealing with children and adolescents psychological assessment seems to take on an even greater role Therefore it follows that comprehensive graduate level instruction in assessment should be a high priority for educators of psychologists who will work with these youth This textbook is organized into three sections consistent with the authors approach to teaching Part I provides students with the psychological knowledge base necessary for modern assessment practice including historical perspectives measurement science child psychopathology ethical legal and cultural issues and

the basics of beginning the assessment process Part II gives students a broad review of the specific assessment methods used by psychologists accompanied by specific advice regarding the usage and strengths and weaknesses of each method In Part III we help students perform some of the most sophisticated of assessment practices integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth A text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development For example several of the major tests reviewed in the text such as the Behavioral Assessment System for Children and the Child Behavior Checklist have undergone major revisions since the publication of the last edition making the current content outdated Further another major test the Conners Rating Scales is undergoing substantial revisions that should be completed before publication of the next edition Finally the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current For example there was a special issue of the Journal of Clinical Child and Adolescent Psychology published focusing on evidenced based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in Part 3 This latter point reflects an important trend in the field that should influence the marketing of the book That is there are several initiatives being started in all of the major areas of applied psychology e g school clinical and counseling to promote evidenced based assessment practices These initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment This has been the orientation of this textbook from its first edition that is Clinical Assessment of Child and Adolescent Personality and Behavior has focused on using research to guide all recommendations for practice The ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology
