

Toddler and Infant Motor Evaluation

Created for children ages birth to age three years and six months, the Toddler and Infant Motor Evaluation (TIME) assesses movement quality.

Five subtests that assess mobility, stability, motor organization, social/emotional abilities, and functional performance. Optional subtests are available for advanced practitioners and include component analysis, quality rating, and atypical movements.

Activities include sequencing movement into different positions and free-play with a caregiver. Open-ended parent questions along with a Likert questionnaire provide both contextual information and data on current performance.

Clinician's Handbook of Child Behavioral Assessment Michel Hersen, 2011-04-28 Given the vast amount of research related to behavioral assessment it is difficult for clinicians to keep abreast of new developments In recent years there have been advances in assessment case conceptualization treatment planning treatment strategies for specific disorders and considerations of new ethical and legal issues Keeping track of advances requires monitoring diverse resources limited to specific disorders many of which give short shrift to child assessment overlooking developmental considerations Much of the existing literature is either theoretical research in focus or clinical in nature Nowhere are the various aspects of child behavioral assessment placed in a comprehensive research clinical context nor is there much integration as to conceptualization and treatment planning The Clinician's Handbook of Child Behavioral Assessment was created to fill this gap summarizing critical information for child behavioral assessment in a single source The Clinician's Handbook of Child Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes child abuse assessment classroom assessment behavioral neuropsychology academic skills problems and ethical legal issues Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective child behavioral assessment

Intervention with

Infants and Toddlers Joyce S. Taylor, 2004 The goal of this book is to assist families and caregivers in the early intervention care and development of the toddler and to be instrumental in reaching the child's potential By drawing attention to the ways in which some children with disabilities have been excluded from public education these families and caregivers become aware of the importance of understanding the law its content and its implications It is also important to be aware of the laws that have been tested through litigation The author provides a comprehensive yet easily understandable background on these laws and includes basic insight into various examples Main topics include 1 Federal legislation and state compliance child find and screening evaluation determination of eligibility the IFSP service delivery and reimbursement of the early intervention process 2 co treatment and assisted intervention counseling limiting services the efficacy of early intervention 3 professional responses consumer satisfaction and knowledge of risk versus at risk challenges and 4 socioeconomic and cultural diversity and how professionals view each other as team members including their comments Personal experiences are provided which serve to make a point and or bring levity to sometimes grave situations These experiences contribute to the subjective opinions and research findings that promote the efficacy of early intervention In addition this book explores the benefits and success of animal assisted intervention The primary audience for the book includes parents educators social workers and others who work with toddlers who have special needs and challenges *Autism Spectrum Disorders in Infants and Toddlers* Katarzyna Chawarska, Ami Klin, Fred R.
