Mobile Technologies in Libraries Ben Rawlins, 2016-09-08 The ever expanding usage of mobile technologies has dramatically changed how we access information and how we as a society expect to access information With mobile

technologies becoming available to an increasing majority of the population users are constantly connected to information. The rapid expansion of mobile technology has had a profound impact on many different sectors, industries and institutions among those that have been affected are libraries. With more users expecting access to information and resources in a mobile optimized format, libraries have had to adapt to meet the needs of users. This has entailed evaluating various library services and resources to determine how to best meet the needs of mobile users. Additionally, mobile technology has changed the way that websites are designed and has led to an increasingly popular type of web design known as responsive web design (RWD). This enables web developers to design websites with one code base that are optimized for a wide range of devices from desktop computers to smartphones. Libraries must keep their mobile services current or risk becoming obsolete. Based on research, examples and experience using mobile technology, this book will include topics such as: The impact of mobile technology, Mobile technology and the Digital Divide, Implications for library staff and vendors, Responsive Web Design, Wearable technology in library services, Mobile Technologies in Libraries. A LITA Guide is written for library staff interested in how mobile technologies have changed the way we access and expect to access information as well as how libraries can incorporate and adapt to mobile technology.

Automated Driving and Driver Assistance Systems Tom Denton, 2019-10-16. Automated vehicles are set to transform the world. Automated driving vehicles are here already and undergoing serious testing in several countries around the world. This book explains the technologies in language that is easy to understand and accessible to all readers. It covers the subject from several angles but in particular shows the links to existing ADAS technologies already in use in all modern vehicles. There is a lot of hype in the media at the moment about autonomous or driverless cars and while some manufacturers expect to have vehicles available from 2020 they will not soon take over and it will be some time before they are commonplace. However, it is very important to be ready for the huge change of direction that automated driving will take. This is the first book of its type available and complements Tom Denton's other books: *Road and Track*, 2005; *Searcher*, 2005; ***The Viking Opera Guide*** Amanda Holden, Nicholas Kenyon, Stephen Walsh, 1993. The book, which was published early this year and is available unbundled from the CD-ROM for £69.95, contains information on more than 800 composers and examines some 1,500 operas in detail. Each composer's musical career is outlined with an assessment of his or her overall contribution to opera. Opera entries include cast lists and orchestral forces, a commentary on the background of the work, a synopsis of the plot and a musical analysis identifying musical highlights and points of interest. Recording and edition information is included. For those who don't like to turn pages, prefer to read from the screen or just like the click click of the mouse, the CD-ROM provides computer access via Windows to the information and pictures (small black and whites) of the book. The CD-ROM holds some enhancements, notably three hours of music excerpts unheard by this reviewer who lacks the needed 16-bit sound card. Some, according to the press release, are as long as three to five minutes. Annotation copyright by Book News Inc, Portland, OR.

Condé Nast's Traveler, 2005

Online Activism in Latin America Hilda Chacón, 2018-07-20 Online Activism in Latin America examines the innovative ways in which Latin American citizens and Latin s in the U S use the Internet to advocate for causes that they consider just. The contributions to the volume analyze citizen launched websites interactive platforms postings and group initiatives that support a wide variety of causes ranging from human rights to disability issues indigenous groups struggles environmental protection art poetry and activism migrancy and citizen participation in electoral and political processes. This collection bears witness to the early stages of a very unique and groundbreaking form of civil activism culture now growing in Latin America.
