A Theory of Esthetic According to the Principles of St. Thomas Aquinas ... by Leonard Callahan ... John Leonard Callahan, 1927 **The English Journal**, 1841 *Our Original Scenes* Tomas Geyskens, 2005 Freud's ideas on infantile sexuality can only be understood as constructions that are necessary to understand the psychopathological formations of adults These constructions of infantile sexuality therefore must not be considered to be speculations about infant behaviour as such because in infancy sexuality is obviously a rather marginal problem and because consequently only their nachträglich effects reveal the significance of our infantile sexual experiences In the psychoanalytic cure these infantile experiences are never remembered as such The idea that what is repressed in adults can be observed in infants does not take into account this notion of Nachträglichkeit while Freud's theory cannot be understood without it The relation between the pathological and the infantile bridges the gap between pathology and normality because pathology is caused by universally human problems or weak points infantile sexuality and following our interpretation of the death instinct the infant's radical Hilflosigkeit In psychoanalysis therefore the analysis of the different pathologies has inevitably an anthropological claim To understand what it means to be human says Freud we must analyse the extreme paradigmatic answers to this problem that we all are ourselves The analysis of different pathologies will highlight the different aspects of our infantile experience and its nachträglich effects In this perspective the difference between normality and pathology can only be a quantitative not a qualitative difference In this way Freud transformed the study of psychopathology into a clinical anthropology i e a clarification of the specifically human in human nature by analysing its pathological manifestations **Modern Japanese Aesthetics** Michael F. Introducing Aesthetics David E. Fenner,2003-09-30 This concise yet comprehensive introduction to the discipline of western aesthetical philosophy is focused directly on the central questions of aesthetics Fenner arranges his analysis around four general themes Experiences Objects and Events Meaning and Judgment that progress from issues of everyday experience to subjects of greater subtlety Within these broader themes Fenner explores such issues as The Aesthetic Attitude Defining Art and Reviewing Art Criticism Although a historical organization is employed wherever a particular movement unfolds from earlier movements the text s main organization is not motivated by an academic or historical treatment of the various topics Instead the topics themselves are of primary concern in such a way that readers will come away with a complete overview of the canon of this highly significant area of western philosophy
