Hollywood or History? Lisa K. Pennington, Donna Fortune, Mary E. Tackett, Paige Horst, Meghan A. Kessler, 2024-09-01 Teaching and learning through Hollywood or commercial film and television productions is anything but a new approach and has been something of a mainstay in the classroom for nearly a century. However, purposeful and effective instruction through film is not problem free and there are many challenges that accompany classroom applications of Hollywood motion pictures. In response to the problems and possibilities associated with teaching through film, we are developing a collection of practical classroom ready lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. We believe that film can serve as a powerful tool in the social studies classroom and where appropriately utilized, foster critical thinking and civic mindedness. The NCSS College Career and Civic Life C3 framework represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading, and writing. We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that this edited book might play a small role in the larger project of supporting practitioners, specifically K-6 teachers of social studies content, by offering a collection of classroom ready tools based on the Hollywood or History strategy and designed to foster inquiry through the careful use of selected motion pictures and television productions.

Designer's Guide to Creating Charts & Diagrams Nigel Holmes, 1984 Demonstrates how to take complex abstract statistical data and organize it into an understandable chart or diagram. This book shows what type of chart is suitable for individual jobs, what format is appropriate, and what demands of time, art, and skill are involved in each project. Using well-illustrated sample assignments, the author teaches how to apply four steps to any task, beginning with identifying the reader or user of the chart, selecting a production method, reviewing the numbers, and finding the right symbol around which to design it. This book also discusses the misuse of charts and how to avoid distorting facts. It concludes with how to find sources of inspiration in nature and the world around us. This book is designed to be of interest to graphic designers, art directors, editors, and anyone who uses charts to convey information.
