

Topcon is the world leader in survey instrumentation, supplying countless customers with the most advanced total station technology in the industry. In fact, Topcon changed the way topography and related work is done. We continue to lead the industry with innovative solutions from the 1950 introduction of the Gage. For the total station, it's precision, advanced imaging, and long-range EDM functions (distance measurement technology).

Now Topcon is pleased to introduce our latest series of advanced total stations: the reflectorless GPS-7500 and conventional CTS-750. Both models feature 1, 2, or 3 second accuracy to 999,999 ft and budget. Here are benefits of large CMOS color LCD screens and touch keypad on both sides of the unit (1" & 2" models only). All models come standard with a 4000mAh processor and Windows® CE operating system, and increased battery capacity (5000mAh). The USB, USB mini port, and CompactFlash port give you plenty of storage space and speed/download options. There's even Front Guide (CGO) that visually shows the red crosshair for the job's picture. And like all Topcon survey instruments, they are ruggedly built to withstand harsh conditions.

The GPS-7500 provides the world's longest range reflectorless EDM (5000 ft (1500m)). Its reflectorless range measures what you want to measure, even when obstructed by rough obstacles (such as trees or tree branches). Reflectorless range safety: they working a red laser into dangerous terrain a high safety situation. Take shots of areas that are difficult or impossible to access from a safe distance.

Smaller and lighter, it's easy to take into the field, set up and move to find the job quickly and with less trouble. The CTS-750 runs with the 4000mAh total processor (included) when the battery is not needed. Here's how making time less spent at the green and blue.

Smaller, lighter, and faster, the GPS-7500/CTS-750 total stations are setting the new standard by which all total stations will be measured.

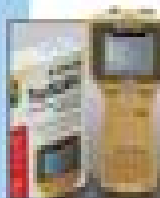

Topcon. For more.
