Schoneveld,2023-11-20 These ten studies provide a view of the extent to which intellectual and literary life in Holland has been influenced by English ideas The book concludes with an overview of Anglo Dutch cultural transfer from the early seventeenth century to the late nineteenth century concentrating on what between Sir Thomas Browne's stay in Leiden in 1633 and L A J Burgersdijk's complete translation of Shakespeare in the 1880s was transmitted what sea changes occurred during the voyage and in how far these resulted in something rich and strange The emphasis in some of the essays is on intellectual or scholarly contacts with Holland mostly on the receiving end but by no means exclusively so In the field of literature proper given the continuing prestige of French letters there lies a special interest in watching the gradually increasing appreciation of English non fiction fiction poetry and drama This was brought about by translations and by the growing familiarity of Dutch cultural leaders with the English language itself in spite of long standing aversions to its composition and sound continuing far into the nineteenth century The analysis of translation strategies and adaptations often made to suit the target culture also contributes to the history of translation a branch of Translation Studies now coming into its own

Handbook on the New Law of the Sea, Volume 1 R.J. Dupuy, Daniel Vignes, 2023-09-20 The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference. Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200 nautical mile fishery zones and drawn on the principles laid down for exploiting living resources. Although these laws have been formulated unilaterally by states, international custom since the judgement by the International Court of Justice in the Fisheries Case of 18 December 1951 is derived from concordant national rules. This shift began even before the Conference ended and has been consolidated since then. Moreover the regime governing the sea bed beyond the limits of national jurisdiction defined by Part XI which was the stumbling block of the Conference is subject to transitional arrangements on the basis of two resolutions adopted in the Conference's Final Act, one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors. This two volume work, an earlier edition of which appeared in French, has been written by a team of experts of international renown. It presents an analysis of the Convention with an additional Chapter on the legal regime governing underwater archaeological and historical objects.

The Sea and Medieval English Literature Sebastian I. Sobecki, 2008 A fresh and invigorating survey of the sea as it appears in medieval English literature from romance to chronicle, hagiography to autobiography. As the first cultural history of the sea in medieval English literature, this book traces premodern myths of insularity from their Old English beginnings to Shakespeare's *Tempest*. Beginning with a discussion of biblical, classical and pre-Conquest treatments of the sea, it investigates how such works as the Anglo-Norman *Voyage of St Brendan*, the Tristan romances, the chronicles of Matthew Paris, *King Horn*, *Patience*, *The Book of Margery Kempe* and *The Libelle of Englyshe Polycye* shape insular ideologies of Englishness. Whether it is Britain's privileged place in the geography of salvation or the political fiction of the idyllic island fortress, medieval English writers' myths of the sea betray their anxieties about their own insular identity: their texts call on maritime motifs to define England geographically and culturally against the presence of the sea. New insights from a range of fields including jurisprudence, theology, the history of cartography and anthropology are used to provide fresh readings of a wide range of both insular and continental writings.

The Great South Sea Glyndwr Williams, 1997-01-01 From the sixteenth to the eighteenth centuries English buccaneers, privateers and naval expeditions sought fame and fortune in the distant reaches of the South Sea. Beginning with the voyage of Francis Drake in the 1570s and continuing through that of George Anson in the 1740s, a series of predatory English adventurers pursued Spanish treasure and for a few the dream of riches came true. For most the voyages ended in disappointment and sometimes death. This engrossing book investigates these maritime adventures and how they were described in popular accounts of the time, accounts that affected English consciousness and perceptions of the wider world.

and that influenced the planning and nature of the later great voyages of James Cook and others Glyndwr Williams a leading expert on the exploration of the Pacific Ocean draws on printed accounts of South Sea voyages as well as unpublished records buccaneer journals expedition papers and government documents from public and private archives For English seamen preying on Spanish trade and treasure the South Sea was limited to the waters lapping the shores of Chile Peru and Mexico But the vision was wider for others Williams reveals Cartographers at home in England untrammelled by the constraints and dangers of actual voyaging produced speculative maps with a vast Terra Australis Incognita with fabulous Islands of Solomon and with a promised short passage from Atlantic to Pacific Satirical and utopian writers from Joseph Hall to Jonathan Swift found ample space in the wide ocean for their fictional travelers And contemporary published voyage accounts marvelous though not necessarily reliable further blurred the line between real and imaginary contributing to the alluring exotic image of the South Sea that took root in English folk memory and long outlasted the age of the buccaneers
