Technically Food Larissa Zimmeroff, 2021-06-01 In a feat of razor sharp journalism Zimmeroff asks all the right questions about Silicon Valley's hunger for a tech driven food system If you like me suspect they're selling the sizzle more than the steak read Technically Food for the real story Dan Barber the chef and co owner of Blue Hill and Blue Hill at Stone Barns Eating a veggie burger used to mean consuming a mushy flavorless patty that you would never confuse with a beef burger But now products from companies like Beyond Meat Impossible Foods Eat Just and others that were once fringe players in the food space are dominating the media menus in restaurants and the refrigerated sections of our grocery stores With the help of scientists working in futuristic labs making milk without cows and eggs without chickens start ups are creating wholly new food categories Real food is being replaced by high tech Technically Food Inside Silicon Valley's Mission to Change What We Eat by investigative reporter Larissa Zimmeroff is the first comprehensive survey of the food companies at the forefront of this booming business Zimmeroff pokes holes in the mania behind today's changing food landscape to uncover the origins of these mysterious foods and demystify them These sometimes ultraprocessed and secretly produced foods are cheered by consumers and investors because many are plant based often vegan and help address societal issues like climate change animal rights and our planet's dwindling natural resources But are these products good for our personal health Through news breaking revelations Technically Food examines the trade offs of replacing real food with technology driven approximations Chapters go into detail about algae fungi pea protein cultured milk and eggs upcycled foods plant based burgers vertical farms cultured meat and marketing methods In the final chapter Zimmeroff talks to industry voices including Dan Barber Mark Cuban Marion Nestle and Paul Shapiro to learn where they see food in 20 years As our food system leaps ahead to a sterilized lab of the future we think we know more about our food than we ever did But because so much is happening so rapidly we actually know less about the food we are eating Until now *Vegetarian Times* , 2000-03 To do
