opengroup.org/it4it **The TOGAF® Standard, 10th Edition - Business Architecture - 2025 Update** The Open Group, 2025-06-30 This document is a compilation of TOGAF Series Guides addressing Business Architecture. It has been developed and approved by The Open Group and is part of the TOGAF Standard 10th Edition. It consists of the following documents:

- TOGAF Series Guide Business Models** This document provides a basis for Enterprise Architects to understand and utilize business models which describe the rationale of how an organization creates, delivers, and captures value. It covers the concept and purpose of business models and highlights the Business Model Canvas™ technique.
- TOGAF Series Guide Business Capabilities Version 2** This document answers key questions about what a business capability is and how it is used to enhance business analysis and planning. It addresses how to provide the architect with a means to create a capability map and align it with other Business Architecture viewpoints in support of business planning processes.
- TOGAF Series Guide Value Streams** Value streams are one of the core elements of a Business Architecture. This document provides an architected approach to developing a business value model. It addresses how to identify, define, model, and map a value stream to other key components of an enterprise's Business Architecture.
- TOGAF Series Guide Information Mapping** This document describes how to develop an Information Map that articulates, characterizes, and visually represents information that is critical to the business. It provides architects with a framework to help understand what information matters most to a business before developing or proposing solutions.
- TOGAF Series Guide Organization Mapping** This document shows how organization mapping provides the organizational context to an Enterprise Architecture. While capability mapping exposes what a business does and value stream mapping exposes how it delivers value to specific stakeholders, the organization map identifies the business units or third parties that possess or use those capabilities and which participate in the value streams.
- TOGAF Series Guide Business Scenarios** This document describes the Business Scenarios technique, which provides a mechanism to fully understand the requirements of information technology and align it with business needs. It shows how Business Scenarios can be used to develop resonating business requirements and how they support and enable the enterprise to achieve its business objectives.

Reactions from other readers: A quality hard copy of the TOGAF method, easier to read than endless HTML docs or huge PDFs. The TOGAF framework has become the de facto standard for developing Enterprise Architectures. A good one-stop shop guide and toolsets for getting your Enterprise Architecture right. A lot of thought, experience, and funding have gone into this, and the results are well worth the price you pay for the book and the actual accreditation should you or your organization wish to go down that route.

Amazon Comment: It still is the best documented Enterprise Architecture method publicly available. The book is of high quality binding and will endure. Browsing through the pages for a long time.

For Your Information Philip Tetlow, 2024-08-12 In recent times physicists have come to appreciate information's central role in the universe's grand plan That and the fact that an explicit understanding of the informational relationships involved may well be key to unlocking many of the universe's deepest secrets That makes the birth of both Computer and Information Science not only essential to the explosion of modern technological success but also to our understanding of reality itself In recognizing that what unfolds is a story not only about Alan Turing and his pioneering colleagues but also great thinkers like Albert Einstein Michael Faraday Ludwig Wittgenstein and others It therefore pulls in much of modern history and touches on seminal events like the birth of the atomic bomb It also hints at the reasons behind the various social and political divides we see in the world today So in many ways the story of how we became more informed about information is also the story of the modern age What you will read of here is the role that information plays in that ongoing saga and many of the twists and turns that have brought us to where we are with information today In it you will learn that unbeknown to Turing and others their work would not only help overthrow the Nazis and thaw the chilling atmosphere of the Cold War to come but also echo down the ages to remain relevant in a conflict still raging today That sees the Computer and Information Scientists at loggerheads as they fight to find a right and justifiable place for meaning in information's definition About The Open Group Press The Open Group Press is an imprint of The Open Group for advancing knowledge of information technology by publishing works from individual authors within The Open Group membership that are relevant to advancing The Open Group mission of Boundaryless Information Flow™ The key focus of The Open Group Press is to publish high quality monographs as well as introductory technology books intended for the general public and act as a complement to The Open Group standards guides and white papers The views and opinions expressed in this book are those of the authors and do not necessarily reflect the consensus position of The Open Group members or staff

Ecosystems Architecture Philip Tetlow, Neal Fishman, Paul Homan, Rahul, 1970-01-01 Today modern business is adrift in a sea of connectivity and potential Where once an organization's IT needs could be met from within its four walls we now see many mission critical systems reaching out beyond an enterprise's traditional boundaries This is pushing solutions design well beyond the comfort zone of Enterprise Architecture and out into a world of hyper enterprise systems This is a world of complexity and scale where the changing status quo demands that organizations keep

up or die To survive their IT systems must also evolve as the context of their environment s ebbs and flows The result is a dynamic interconnected web of critical business advantage balanced against uncertainty and risk and infused with AI This is the world of Ecosystems Architecture This book will introduce you to the challenges of designing hyper enterprise IT systems and the tools you will need as the era of Ecosystems Architecture dawns It explains the proximity of new thinking to long held architectural tenets and outlines how and why thinking has moved on It also reviews existing frameworks and explains how and why they fit into the broader landscape of architectural thinking About The Open Group Press The Open Group Press is an imprint of The Open Group for advancing knowledge of information technology by publishing works from individual authors within The Open Group membership that are relevant to advancing The Open Group mission of Boundaryless Information Flow™ The key focus of The Open Group Press is to publish high quality monographs as well as introductory technology books intended for the general public and act as a complement to The Open Group Standards Guides and White Papers The views and opinions expressed in this book are those of the authors and do not necessarily reflect the consensus position of The Open Group members or staff
