Double Truffle S. Kay Weber, 2007-08 In *The Rise and Fall of Dr Mom* Angela Lowe Heider describes in raw detail her short career as an obstetrician and gynecologist She highlights the many challenges female physicians and their families face and draws attention to the delicate balance all working women must achieve to ensure peace on the home front while allowing for professional pursuits outside the home Through vivid personal accounts Dr Heider invites the reader into the mind and emotions of one physician struggling to maintain that balance The reasons for her decision to retire from the practice of medicine at the young age of thirty two are frankly defined with compelling honesty The Rise and Fall goes on to more briefly describe the lives and careers of six other female physicians all of whom have faced similar obstacles Some like Dr Heider have decided to retire from the practice of medicine Others have found ways to make medical careers work for their families Each story provides further insight All women working or otherwise will identify with the emotionally charged decisions every woman must make about the type of mother she will be Dr Heider then delineates the many problems our American health care system currently faces Specifically she cites antiquated training programs unaffordable medical care a health care delivery system mired in bureaucracy and the ongoing medical malpractice crisis The Rise and Fall of Dr Mom offers thoughtful solutions professional insights and an optimistic plan for the future

The Canning of Foods and Some Tested Recipes Henry Meech Loomis, 1929 *Handbook on Fruits, Vegetables & Food Processing with Canning & Preservation (3rd Edition)* NPCB Board, 2012-02-09 Natural foods such as fruits and vegetables are among the most important foods of mankind as they are not only nutritive but are also indispensable for the maintenance of the health India is the second largest producer of fruits and vegetables in the world Fertile soils a dry climate clean water and abundant sunlight help the hard working farmers to produce a bountiful harvest Although there are many similarities between fruits and vegetables there is one important difference that affects the way that these two types of crop are processed like fruits are more acidic than vegetables Food processing is the set of methods and techniques used to transform raw ingredients into food or to transform food into other forms for consumption Food processing typically takes clean harvested crops or butchered animal products and uses these to produce attractive marketable and often long shelf life food products Canning is a method of preserving food in which the food is processed and sealed in an airtight container Food preservation is the process of treating and handling food to stop or greatly slow down spoilage loss of quality edibility or nutritive value caused or accelerated by micro organisms One of the oldest methods of food preservation is by drying which reduces water activity

sufficiently to prevent or delay bacterial growth Drying also reduces weight making food more portable Freezing is also one of the most commonly used processes commercially and domestically for preserving a very wide range of food including prepared food stuffs which would not have required freezing in their unprepared state Fruits and vegetable processing in India is almost equally divided between the organized and unorganized sector with the organized sector holding 48% of the share The present book covers the processing techniques of various types of fruits vegetables and other food products This book also contains photographs of equipments and machineries used in fruits vegetables and food processing along with canning and preservation This book is an invaluable resource for new entrepreneurs food technologists industrialists etc
