Tone

"I confess that I am in love with wood. Wood has its own personality. It talks to me. It is grateful in its consistency, its hardness or softness, its texture. The vibrating wood, just a plain wood vibrating in the wind, is music. And if you put it into a properly designed soundhole, as Chris said, scrap wood around the soundhole, you got a guitar tone. Tone is the key word in my opinion. There is a tendency to over emphasize the appearance, the figure of the wood rather than the tone, and they don't always go together!" — C.F. Martin III

We embark on a rare journey in this edition of the Quest... We begin by exploring the fundamental essence of the beautiful tones created by C.F. Martin Guitars — wood. In all its varied forms — rosewood, mahogany, ebony and spruce — wood cut from living trees has always defined the captivating signature sound of Martin guitars. Our journey begins with a revealing conversation with Dick Boak, who has worked at Martin since 1973 while developing the Artist Relations program that has produced more than 140 signature Martin guitars, and Martin wood expert and buyer Linda Davis-Wallen. We then take a fascinating step back in time, to a talk given by C. F. Martin III at an ASA (Association Of Stringed Instrument Artisans) symposium in 1985 when Mr. Martin was 91 years old. His thoughtful words are timeless and instructive. We close with an extraordinarily insightful review of the Martin CEO 7, in our opinion one of the most uniquely useful Martin guitars we have ever played despite its comparative obscurity within the entire Martin line.

From wood and acoustic tone we leap to the mysterious underworld of guitar effects created by a sonic artist who pokes with electronic components selected and assembled to produce tones first imagined in the mind before being committed to a physical circuit board. Robert Keeley's talent for creating truly exceptional guitar effects is a matter of record — what may be less evident are the inspiration and challenges he has
