Y. Wong, 2013-01-30 Introduces a powerful new approach to financial risk modeling with proven strategies for its real world applications The 2008 credit crisis did much to debunk the much touted powers of Value at Risk VaR as a risk metric Unlike most authors on VaR who focus on what it can do in this book the author looks at what it cannot In clear accessible prose finance practitioners Max Wong describes the VaR measure and what it was meant to do then explores its various failures in the real world of crisis risk management More importantly he lays out a revolutionary new method of measuring risks Bubble Value at Risk that is countercyclical and offers a well tested buffer against market crashes Describes Bubble VaR a more macro prudential risk measure proven to avoid the limitations of VaR and by providing a more accurate risk exposure estimation over market cycles Makes a strong case that analysts and risk managers need to unlearn our existing science of risk measurement and discover more robust approaches to calculating risk capital Illustrates every key concept or formula with an abundance of practical numerical examples most of them provided in interactive Excel spreadsheets Features numerous real world applications throughout based on the

author's firsthand experience as a veteran financial risk analyst *Value at Risk, 3rd Ed., Part I - Motivation* Philippe Jorion, 2006-10-19 This chapter comes from *Value at Risk* the industry standard in risk management Now in its Third Edition this international bestseller addresses the fundamental changes in the field that have occurred across the globe in recent years Philippe Jorion provides the most current information needed to understand and implement VAR as well as manage newer dimensions of financial risk *Market Risk Analysis, Value at Risk Models* Carol Alexander, 2009-02-09 Written by leading market risk academic Professor Carol Alexander *Value at Risk Models* forms part four of the *Market Risk Analysis* four volume set Building on the three previous volumes this book provides by far the most comprehensive rigorous and detailed treatment of market VaR models It rests on the basic knowledge of financial mathematics and statistics gained from Volume I of factor models principal component analysis statistical models of volatility and correlation and copulas from Volume II and from Volume III knowledge of pricing and hedging financial instruments and of mapping portfolios of similar instruments to risk factors A unifying characteristic of the series is the pedagogical approach to practical examples that are relevant to market risk analysis in practice All together the *Market Risk Analysis* four volume set illustrates virtually every concept or formula with a practical numerical example or a longer empirical case study Across all four volumes there are approximately 300 numerical and empirical examples 400 graphs and figures and 30 case studies many of which are contained in interactive Excel spreadsheets available from the accompanying CD ROM Empirical examples and case studies specific to this volume include Parametric linear value at risk VaR models normal Student t and normal mixture and their expected tail loss ETL New formulae for VaR based on autocorrelated returns Historical simulation VaR models how to scale historical VaR and volatility adjusted historical VaR Monte Carlo simulation VaR models based on multivariate normal and Student t distributions and based on copulas Examples and case studies of numerous applications to interest rate sensitive equity commodity and international portfolios Decomposition of systematic VaR of large portfolios into standard alone and marginal VaR components Backtesting and the assessment of risk model risk Hypothetical factor push and historical stress tests and stress testing based on VaR and ETL **Risk-Return Relationship and Portfolio Management** Raj S. Dhankar, 2019-10-24 This book covers all aspects of modern finance relating to portfolio theory and risk return relationship offering a comprehensive guide to the importance measurement and application of the risk return hypothesis in portfolio management It is divided into five parts Part I discusses the valuation of capital assets and presents various techniques and models used in this context Part II then addresses market efficiency and capital market models particularly focusing on measuring market efficiency which is a crucial factor in making correct investment decisions It also analyzes the major capital market models like CAPM and APT to determine to what extent they are suitable for use in developing economies Part III highlights the significance of risk return analysis as a prerequisite for investment decisions while Part IV examines the selection and performance appraisals of portfolios against the backdrop of the risk return relationship It also

examines new tools such as the value at risk application for mutual funds and the applications of the price to earnings ratio in portfolio performance measurement Lastly Part V explores contemporary issues in finance including the relevance of Islamic finance in the increasingly volatile global financial system **Alternative Investments** H.
