

Vauxhall Vivaro 2001-2014 Electrical Systems

DRIVER'S AIR BAG MODULE

The driver's air bag is fitted with a specific cushion with SPP (markings) linked to the speed.

The Renault Protection System for the driver's air bag is calibrated specifically for the Renault Vivaro, to this type of air bag.

Description

It is located on the steering wheel cushion. When triggered, the air bag deploys by sending the signal to the wheel cover.

Removal

IMPORTANT: before removing an air bag cushion, lock the computer using the diagnostic tool. When this function is activated all the system lines are isolated and the air bag warning light on the instrument panel lights up when the system is switched on.

Insert a connector in the steering wheel.

Slide (2) the connector in place.

Undo the connector.

Disconnect the connectors.

IMPORTANT: refer to section describing the Destruction procedure when scrapping an air bag that has not been triggered.

Refitting

Note: when replacing an air bag after an impact, it is essential to replace the steering wheel and its mounting bolt (tightening torque: 4.4 daN/m).

Put the connector in place and lock it.

Position the cushion on the steering wheel.

Slide it backwards in order to clip it in place.

IMPORTANT: After refitting everything, carry out a check using a diagnostic tool. If everything is in order, unlock the computer; otherwise, refer to the fault finding section.
