Top Secret Business Humor Thejendra Sreenivas,101-01-01 The modern workplace has always been a source of comedy for decades though very few people are willing to openly admit it Many executives believe that humor and laughter are unproductive or unprofessional and that being serious and gloomy is the only respectable way to spend their work life As a result most modern offices have become extremely humorless artificial and stressful places But we don t have to be

humorless to run a business In fact the ability to laugh at yourself and your work is one of the true qualities of great and successful leaders A good sense of humor can defuse tension lighten difficult situations and even help solve complex personal and business problems creatively To do that you must be willing to think in atrocious ridiculous and illogical ways Modern management consultants like to call this thinking out of the box but I prefer to call it old fashioned creativity and humor something that has existed for centuries Top Secret Business Humor is a collection of witty satire inspired by the corporate jungle its processes performances strategies customer obsessions endless meetings quality crusades and the daily dramas we endure for several hours a day This book invites you to explore the creative and wackier side of office life to laugh to reflect and to rejuvenate your day All chapters are entirely fictitious and best taken with a pinch of salt though the paper may not be edible The author makes no representations or warranties of any kind regarding the accuracy usability or usefulness of the contents So go ahead get serious about adding some humor to your life

Governance for Harmony in Asia and Beyond Julia Tao, Anthony B. L. Cheung, Martin Painter, Chenyang Li, 2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated

Foucault and School Leadership Research Denise Mifsud, 2017-09-21 Foucault and School Leadership Research illustrates the application of Foucauldian theory to an educational leadership research context thus staging the ways a researcher negotiates the methodological tensions and contradictions in the conduct of qualitative inquiry within education research The book draws on an empirical study of a multi site school collaborative that investigates relations of power within the unfolding network among the various leadership hierarchies in school governance The book is anchored around a narrative dramatization that the author Denise Mifsud crafts from her data using the dramatic play as a medium to present her research findings so as to show rather than just tell readers about network leadership dynamics Mifsud s innovative use of dramatization to communicate her findings and analysis serves to problematize the representation of qualitative research as well as to incorporate researcher interpretation and explicate the intertwining nature of theory and methodology Through the use of Foucauldian theory mainly his notions of webs of power discipline governmentality discourse and subjectification the research narrative critiques and problematizes traditional understandings of educational leadership The book focuses on and demonstrates the challenging enterprise of the art of theory application in method by outlining the epistemological

operational and analytical challenges encountered the application of Foucauldian concepts in education research contexts the adaptation of methodological and theoretical concerns in addition to showing how the quality of research outcomes is shaped by social theory Journal of Education and School World ,1889
