The previous edition was praised for the quality of its coverage, the clarity of its style and the strength of its sections on operation and supply chain issues such as buying and logistics, which are often neglected by other texts. This new edition has been comprehensively reworked in response to the rapid changes to the industry, including the growth of online retail and the subsequent decline of physical retail space and new technologies that improve customer experience and help track consumer behaviour. It also builds upon the authors' research over the last decade with new chapters on offshore sourcing and CSR and product management, in addition to considerable revisions to existing chapters to highlight changes in online retailing and e-tail logistics, retail branding, retail security, internationalisation and the fashion supply chain. This edition will also be supported by a collection of online teaching materials to help tutors spend less time preparing and more time teaching.
