Like Sex with Gods Bayla Singer, 2003 Human flight is not a simple matter of science and technology It is a continuing epic of dreams and obsession of yearning and striving to harness the intellect in the service of the emotions In *Like Sex with Gods An Unorthodox History of Flight* Bayla Singer offers a unique approach to humanity s fascination with flying Rather than merely tracing the factual prehistory of flight up to the success of the Wright Brothers Bayla Singer considers the interaction and influence of our dreams fantasies culture and technology on the age old quest to fly This enlightening study begins with the deities and other denizens of the heavens that humanity has created in its religion literature and art At first a monopoly of the gods flight came to interest humanity as a way to free itself from the physical and intellectual bonds of the earth The myth of flight eventually gives way to the pursuit of actual flight Singer shows in compelling detail the many flying machines that have been created including balloons gliders and kites The accomplishment of the Wright Brothers and our successful trips into space are merely stops on a continuing journey as our ancient dream of flight continues to push us to new and loftier places Filled with compelling stories and detailed illustrations this book provides absorbing reading for aviation experts those fascinated with the intimate relationship between technology and culture and all of us who have even a passing interest in flying

Ontology

and Providence in Creation Mark Ian Thomas Robson, 2011-11-03 Ontology and Providence in Creation critically examines a particular Leibnizean inspired understanding of God's creation of the world and proposes that a different understanding should be adopted. The Leibnizean argument proposes that God's understanding encompassed a host of possible worlds only one of which he actualized. This proposition is the current orthodoxy when philosophers and theologians talk about the philosophical understanding of creation. Mark Robson argues that this commits the Leibnizean to the notion that possibility is determinate. He proposes that this understanding of creation does not do justice to the doctrine that God created the world out of nothing. Instead of possible worlds, Robson argues that we should understand possibility as indeterminate. There are no things in possibility; hence God created out of nothing. He examines how this conception of possibility is held by C. S. Peirce and how it was developed by Charles Hartshorne. Robson contends that not only does the indeterminate understanding of possibility take seriously the nothing of *ex nihilo* but that it also offers a new solution to the problem of evil. **A Child's**

Book of Myths, 2013-04-22 Reproduced from two charmingly illustrated volumes of the 1920s, this volume features 88 color images and 19 immortal tales. A bonus CD contains a selection of stories from the book. **Beyond Expectations** Sydney Collier, Heather Wallace, 2025-11-04 A memoir that captures a young athlete's battle with a devastating diagnosis and the courage and perseverance that has propelled her to the top of a Paralympic sport. For seven years Sydney Collier enjoyed the life of a happy, active child with caring, supportive parents and siblings. She ran through sprinklers and played with neighborhood friends. And she fell in love with four-legged animals, especially horses. Her mother encouraged her to ride, and Sydney was good at it, finding herself at home in the saddle. Then a routine eye exam changed everything. Sydney had the incredibly rare Wyburn-Mason Syndrome, a congenital birth defect that causes arteriovenous malformations where the veins and arteries in the brain don't separate as they should through capillaries. The resulting clumps of veins and arteries have increased blood flow and a high risk of aneurysm, and they tend to affect the brain, eye, and facial structures. Fewer than 100 cases of Wyburn-Mason Syndrome have been reported according to the National Institute of Health, and its rarity means treatment remains controversial and prognosis uncertain. Most diagnoses in infants have been confirmed by pathologists after death. Wyburn-Mason began to take an immediate toll on Sydney's body, first with its effect on her vision and soon severe physical debilitation and excruciating migraines. Over the next eight years, as she and her family tried treatment after treatment, seeking some sort of hope, the only place where Sydney could escape the almost constant pain for just a little while was on the back of a horse. During a risky brain surgery in 2009, Sydney suffered a devastating and massive stroke which inflicted a new level of disability, putting her in a wheelchair. Determined to ride horses again, Sydney entered a rehabilitation center and refused to give up on her goal of one day riding at the high performance level for the United States. A year later, on a trip with her mother to the World Equestrian Games in Kentucky, Sydney had a chance to watch the sport of Para Dressage, and that moment helped finally turn what seemed an overwhelming tide of loss and suffering. A new goal was born.

to become a competitor in the Paralympics and to do it in partnership with the only thing that brought her peace and happiness horses This is the story of a brave young woman s journey from the doctors offices to medal podiums in her words Anyone looking for a reason to believe that dreams can be realized regardless of the odds will find motivation in these pages
