Solving Equations (Elementary Math Algebra) Lee Jun Cai, Chapter 3 Solving Equations In Chapter 3 we focus on one of the most fundamental skills in algebra solving equations This chapter guides you through the essential techniques and strategies for solving different types of equations from simple linear equations to more complex ones You ll learn how to manipulate equations to isolate variables and find their solutions step by step What You ll Learn Solving Simple Linear Equations Begin with basic equations involving a single variable Learn how to isolate the variable and solve for its value using inverse operations such as addition subtraction multiplication and division Solving Equations with Fractions Discover how to solve equations that involve fractions by eliminating the denominators simplifying the problem and solving for the unknown variable Solving Equations with Variables on Both Sides Understand how to handle equations where variables appear on both sides You ll learn to move terms and simplify to find the solution Solving Equations with Parentheses Learn to solve equations that involve parentheses by applying the distributive property and simplifying before isolating the variable Checking Your Solutions Learn the importance of checking your solutions by substituting them back into the original equation to ensure they satisfy the equation By the end of this chapter you ll be proficient in solving a variety of equations Whether the equation is simple or more complex you will have the tools and techniques to solve it confidently The chapter includes a variety of examples practice problems and tips to reinforce your skills Let me know if you d like to adjust or add anything

Making Subjects of Formula (Elementary Math Algebra) Lee Jun Cai, Chapter 4 Making Subjects of Formulae In Chapter 4 we explore the important skill of manipulating formulae to make a specific variable the subject of the equation This chapter is key for solving problems in algebra science and engineering where understanding and rearranging formulae is essential You will learn how to isolate any variable in a formula and rewrite it in terms of other variables What You ll Learn Understanding Formulae Begin by understanding what a formula is and how it relates different variables Learn how formulae are used in real world applications from physics to finance Rearranging Simple Formulae Start with simple algebraic formulae and practice moving terms around to make one variable the subject You ll master the process of isolating variables through addition subtraction multiplication and division

Rearranging Complex Formulae Build on your skills to tackle more complex formulae with multiple variables You ll learn how to apply the same principles to equations that involve more terms and operations including powers and roots Making One Variable the Subject Focus on how to isolate a specific variable within a formula whether it s a linear quadratic or fractional equation You ll gain confidence in working with a wide variety of expressions Formulae Involving Fractions Learn techniques for handling formulae that contain fractions including how to multiply both sides of an equation by the denominator to eliminate fractions and isolate the required variable By the end of this chapter you ll have the skills to rearrange and manipulate formulae to solve for any variable You ll be able to approach a wide range of algebraic problems and apply these techniques in everyday problem solving Let me know if you d like to make any adjustments or add further details
