

These data demonstrate a clear relationship between the number of children in the household and the number of children in the household who are under 18 years of age. The data also show that the number of children in the household is a significant factor in determining the number of children in the household who are under 18 years of age.

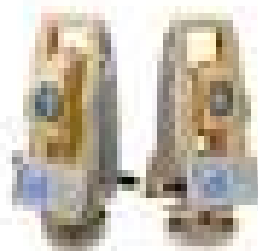

and a comprehensive understanding of the factors that influence the effectiveness of the intervention. The study will also aim to identify the barriers and facilitators to the implementation of the intervention in the community setting. The study will be conducted in a community-based setting, and the results will be used to inform the development of a community-based intervention to reduce the risk of HIV infection.
