Comparative Sociology of Examinations Fumiya Onaka, 2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non-Western countries tend to conduct detailed multi-layered and continuous systems of tests or examinations

International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East, the North and the South, tribal and mass society, ancient and postmodern civilization, and so on. Comparing parallel societies from across Asia, the Middle East, Europe and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics and big data analyses to make comparisons on broad scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.

Social Studies Education in South and South East Asian Contexts Kerry J Kennedy, 2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers

policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them
