Weekly Weather and Crop Bulletin ,2001 **Prisoner of the Rising Sun** John M. Beebe,2006-02-15 A never before published account of the experience of an American officer at the hands of Japanese captors Prisoner of the Rising Sun offers new evidence of the treatment accorded officers and shows how the Corregidor prisoners fared compared with the ill fated Bataan captives When Japanese aircraft struck airfields in the Philippines on December 8 1941 Col Lewis C Beebe was Gen Douglas MacArthur s chief supply officer Promoted to brigadier general he would become chief of staff for General Wainwright in early March 1942 From his privileged vantage point Beebe kept diary records of the Japanese invasion of the Philippines their advance to Manila and capture of the Bataan Peninsula and their assault on Corregidor On May 6 Japanese troops assaulted Corregidor and secured the island in less than twelve hours Beebe was among those captured and held prisoner until the end of the war in the Pacific more than four years later During his captivity Beebe managed to keep a diary in which he recorded the relatively benign treatment he and his fellow officers received at least in comparison with the horrific conditions described in the better known accounts of less high ranking POWs held by the Japanese elsewhere He reports on poor rations less than adequate medical care and field work in camps in the Philippines on Taiwan and in Manchuria He also describes the sometimes greedy and selfish behavior of his fellow captives as well as a lighter side of camp life that included work on a novel singing POW concerts and Red Cross visits His philosophy demanded that captivity should be borne with optimism and self respect Annotation and an epilogue by General Beebe s son Rev John M Beebe add details about his military career and an informative introduction by historian Stanley L Falk places the diary in the context of the broader American experience of captivity at the hands of the Japanese The diary itself not only provides new details of the treatment of officers by the Japanese army but also offers a glimpse into the psyche of one of the members of the Greatest Generation who transformed his captivity by using it to sort out what was most important in life **Weekly Weather & Crop Bulletin** ,1941 Final yearly issue includes index of special articles December through March issues contain reports of snow and ice conditions [Wisconsin Crop Progress](#) ,2011 *Weekly Compilation of Presidential Documents* ,1978 *Livestock, Meat, Wool, Market News* United States. Agricultural Marketing Service. Livestock Division,1977 *Hay Market News* ,1993 **Curricular Program Implementation in the Context of Randomized Field Trials** Gloria Isabel Miller,2011 Abstract curricular program implementation in the context of randomized field trials Gloria Isabel Miller This study examined three cases of commercially available curricular program implementations to determine if a unified approach to measuring the level of implementation was possible proof of concept Further the study investigated whether the level of curriculum and implementation plan specificity made a difference to the strength of implementation achieved in classrooms and described the implementation evolution in different contexts The study sample consists of a total of 163 teachers in eight school districts across the United States In each case teachers were randomly

assigned to using the curricular innovation or their currently used materials and processes The three cases HS Math NewScience and MathIntervention were purposely chosen to represent three different points of curricular and implementation specificity and two different subject areas math and science Each case features a commercially available program that also had opportunities for teachers to use electronic technology to enhance their learning or to engage their students The cases represent differing student grade levels The cases are different enough to provide a range that exercises the measurement techniques introduced in this study so results can begin to generalize across curricular programs and grades However the cases are similar enough in research design instrumentation and data collection methods to make them comparable A key contribution of this investigation is the creation of a framework to measure the level of implementation the extent to which the teacher and students display the actions behaviors and interactions expected by using the innovation The unified conceptual framework arrived at by using an Activity Theory perspective together with the analytical methods employed provide a way to view the rich complex interaction of implementation as a system with the larger system of the school organization Data from the analysis revealed that variations in the level of implementation were no different regardless of the level of specificity A strong finding of this work is that implementation evolves slowly even when the curricular program is scripted and coaching support is provided to teachers The paper concludes with implications for policy and future research
