This Crowded Earth:

The Crowded Earth Robert Bloch, 2022-09-22 This Crowded Earth is one of the early entries in the overpopulation subgenre It begins with Harry Collins in that far future year of 1997 and follows him through various adventures to 2065 Harry is one of the growing number of people who can't stand the over crowded cities He lives in a cramped bachelor's apartment he could upgrade to a larger one if he'd get married but he'd also have to add an hour to his commute each way bringing the total to six hours One day he suffers a mental breakdown and is sent to a bucolic clinic in the country where he soon enters a relationship with a nurse Or so he thinks A doctor at the clinic approaches him with the truth the nurse is another patient who was instructed to deceive him in order to start a tryst They're both in fact part of an experiment to solve the over population problem The doctor is apprehended by the Powers That Be at the clinic and Harry is told the man's a nut But soon his nurse disappears and he ends up in a relationship with another and then another and another Bloch plays coy about what exactly the experiments are about but we eventually learn that they're part of a project to end overcrowding by breeding midget babies Goodreads

This Crowded Earth Robert Bloch, 2018-01-19 Harry Collins is an ad executive in a future Chicago on an Earth whose population has exploded beyond imagining Crazy by the pressures of overcrowding he seeks escape with a suicidal leap from a skyscraper Stopped he is hustled off for psychiatric treatment in a odd encampment where he meets and falls in love with an accommodating nurse named Sue But who is the strange Dr Leffingwell performing experiments on the premises Harry's horrific discoveries in the secret lab cause him to flee into the outside world flee into the forces that would help change and shape this tortured world But then years later when his assassin's rifle is trained on Dr Leffingwell himself he is halted by the mutant product of that fateful lab His own son

This Crowded Earth Robert Bloch Bloch, 2019-08-24 A frighteningly possible future world as seen through the strange and demonic imagination of Robert Bloch

This Crowded Earth Robert Bloch, 2015-09-23 There are others who are talking about this title as well but not have really gave it the treatment it deserves Robert Bloch at the age of 41 wrote a novel that was featured just before writing Psycho Project Gutenberg had the presentation with the artwork as the status unclaimed copyright Now with the technology that exists in the era of the novel Nickolaus Pacione decided to give this the treatment that Amazing Stories were not able to give as this is a novel that's written entirely by itself so instead of an omnibus with other stories as this is presented with This is done with the original artwork The time frame of the book spans about 68 years Robert Bloch's chilling vision of the earth being told in a way only someone who has grown up in Chicago can Pacione having written in the time frame set in 2006 2009 2012 2013 2014 and 2029 with quite a few of his stories figured this was the Robert Bloch title he could introduce and do this right So with this release as Pacione was going Really this novel begins on my beer birthday year Wow why the fuck haven't I looked into this before The cover looks like an album from one of the bands my best friend listened to called Failure The album coming to mind Fantastic Planet the novel as one might see Richard Matheson's I Am Legend set in the 1970s but

written in the 1950s when he was still 27-28 years old Robert Bloch was the teenage protégé of H.P. Lovecraft as Lovecraft written some of his masterpieces at age 41 Paciore had a few protégés himself This novel was a forgotten classic of Bloch's Paciore very carefully handled the updated typesetting of the title and trying to give this a feel to one of his own anthology releases he's working on and trying to finish up Using every bit of the original artwork from the publication as possible to really give this the vibe Finley originally intended for Robert Bloch's novel and Wikisource he was able to give this the treatment he wanted to give it With print-on-demand technology now in its near decade-plus Nikolaus Paciore was able to get published because of this and now one gets to see *This Crowded Earth* entirely by itself The book itself would lend well from this technology as Tabloid Purposes Book Five predicted how this technology revived the print medium Each chapter title is a character's name and a year and each of them tell their story as one of them mentions Wheaton Illinois and another like Paciore was a writer who is published They talk paper publication in the future but it's a question of an operation like either CreateSpace.com or Lulu.com would be around in that time it's a guess So this world in the 1950s this would be a tale of a dark retro future but the question would be how would Paciore's *Cyber Terror Machine* fare in this world Mary Sangiovanni accuses him of being derivative but having an author who grew up near where his late grandmother did It felt this novel would be that release only Paciore can do the introduction and give this justice Chapter Eight of the novel really intrigued Paciore because *Robocop* and *Terminator* were also set in those years too as *Metropolis* would be in that timeline too Paciore thinking Why take part in *Shadows Over Main Street* when I held my own with H.P. Lovecraft and the new anthology will see some surprises of my own Well screw it I am going to introduce this H.P. Lovecraft who was a chief literary influence on Paciore Rod Serling and Bloch were second in command on that department as he was a hometown hero Robert Bloch better known for authoring *Psycho* and edited Robert Bloch's *Psychos* before his passing 21 years after his death we have a special presentation of the first masterpiece *The Crowded Earth* Robert Bloch, 2008-12-01 *This Crowded Earth and Reign of the Telepuppets* Robert Bloch, Daniel F. Galouye, 2012 Armchair Fiction presents extra large editions of classic science fiction double novels *This Crowded Earth* is the first novel penned by the author of *Psycho* Robert Bloch It deals with a future Earth where there are just too damned many people and all of the problems that go along with it Bloch spins a fine tale as he takes a prophetic look at a very possible world of the future The second novel is by sci-fi veteran Daniel F. Galouye *Reign of the Telepuppets* is a wonderful tale about a robot colony run wild To the naked eye they appeared to be nothing but a small group of robotic misfits But the ruling robot a surly pile of circuits and mechanisms named Bigboss was sure that their tiny colony was the center of the universe In fact Bigboss was sure there was no other living creature that was superior to him in any way Yet a constant nagging deep in his robotic memory drums hinted of something different It was a fleeting memory of the far-off world from which he came A world where creatures lived that might actually challenge his rule Little did he know that a spaceship filled with those creatures was hurtling towards him through the void Living

This Crowded Earth** Robert Bloch,1968 *Geeks and Gladiators* Paul Hutchens,2019-03-09 Our universe is not alone We have a sister universe 13.7 billion years ago the Big Bang spawned two identical universes Both universes occupied the same space but they were held apart by a tiny time differential making them entirely invisible and unknown to each other until our universe reached the beginning of the 22nd century The two universes exactly mirrored each other in every detail atom for atom blade of grass for blade of grass person for person thought for thought every detail

except that tiny time differential Tiny though that time differential was over the course of 13 7 billion years it had gradually accumulated until it had exceeded 2 000 years with our sister Earth being our Earth s younger sibling It still precisely mirrored every detail of our Earth but as our Earth was over 2 000 years ago Meanwhile that gradually accumulated time differential also meant that our universe had expanded for 2 000 years longer than the younger universe which meant that the two Earths had drifted three light years apart in their separate spheres of space time This is the story of what happened when scientists on our planet Earth discovered the existence of our sister universe and the means to hop between the two universes and the carnage that ensued when a small group of mostly well meaning scientists decided to pay our sister Earth a visit
