This Idea Must Die Scientific Theories That Are Blocking Progress:

This Idea Must Die John Brockman, 2015-02-17 The bestselling editor of This Explains Everything brings together 175 of the world's most brilliant minds to tackle Edge.org's 2014 question What scientific idea has become a relic blocking human progress Each year John Brockman publisher of Edge.org The world's smartest website The Guardian challenges some of the world's greatest scientists artists and philosophers to answer a provocative question crucial to our time In 2014 he asked 175 brilliant minds to ponder What scientific idea needs to be put aside in order to make room for new ideas to advance The answers are as surprising as they are illuminating In Steven Pinker dismantles the working theory of human behavior Richard Dawkins renounces essentialism Sherry Turkle reevaluates our expectations of artificial intelligence Geoffrey West challenges the concept of a Theory of Everything Andrei Linde suggests that our universe and its laws may not be as unique as we think Martin Rees explains why scientific understanding is a limitless goal Nina Jablonski argues to rid ourselves of the concept of race Alan Guth rethinks the origins of the universe Hans Ulrich Obrist warns against glorifying unlimited economic growth and much more Profound engaging thoughtful and groundbreaking This Idea Must Die will change your perceptions and understanding of our world today and tomorrow [A Twenty-first Century Approach to Community Change](#)

Paula Allen-Meares, 2017 The book discusses a university partner the UM School of Social Work Technical Assistance Center SSW TAC with an embedded foundation driven initiative for neighborhood change to improve outcomes of youth before during and after the massive economic and demographic transformation of Detroit between 2006-2015 **Why Does What**

Exists Exist? Some Hypotheses on the Ultimate "Why" Question Mariano L. Bianca, Paolo Piccari, 2021-02-02 The combination of current cosmology physical theories ancient cosmogonies theologies and metaphysics poses three main questions Why is there something rather than nothing Why does being take many forms What is the origin of everything Many different answers have been given in various different fields to these questions In theological creationist metaphysics the only answer is the existence of a creator who has given rise not only to everything but also to the laws that govern existence Non theological metaphysics instead has engaged in the determination of some first principles arch i from which derives the reality in its various forms Science for a long time evaded these questions focusing instead on particular aspects of reality by formulating explanations of natural phenomena In the course of their current development physics including quantum theory and cosmology have posed questions concerning the origin of the whole universe and the reasons for its existence They believe it is possible to formulate a theory of everything just as metaphysical cosmologists and theologians thought The papers collected in this volume offer interesting contributions to the debates surrounding this ultimate why question **Handbook of Social Work with Groups, Second Edition** Charles D. Garvin, Lorraine M. Guti rrez, Maeda J.

Galinsky, 2017-06-27 Revised edition of Handbook of social work with groups 2006 [Science in the Soul](#) Richard Dawkins, 2017-08-08 NEW YORK TIMES BESTSELLER The legendary biologist and bestselling author mounts a timely and

passionate defense of science and clear thinking with this career spanning collection of essays including twenty pieces published in the United States for the first time For decades Richard Dawkins has been a brilliant scientific communicator consistently illuminating the wonders of nature and attacking faulty logic Science in the Soul brings together forty two essays polemics and paeans all written with Dawkins s characteristic erudition remorseless wit and unjaded awe of the natural world Though it spans three decades this book couldn t be more timely or more urgent Elected officials have opened the floodgates to prejudices that have for half a century been unacceptable or at least undercover In a passionate introduction Dawkins calls on us to insist that reason take center stage and that gut feelings even when they don t represent the stirred dark waters of xenophobia misogyny or other blind prejudice should stay out of the voting booth And in the essays themselves newly annotated by the author he investigates a number of issues including the importance of empirical evidence and decries bad science religion in the schools and climate change deniers Dawkins has equal ardor for the sacred truth of nature and renders here with typical virtuosity the glories and complexities of the natural world Woven into an exploration of the vastness of geological time for instance is the peculiar history of the giant tortoises and the sea turtles whose journeys between water and land tell us a deeper story about evolution At this moment when so many highly placed people still question the fact of evolution Dawkins asks what Darwin would make of his own legacy a mixture of exhilaration and exasperation and celebrates science as possessing many of religion s virtues explanation consolation and uplift without its detriments of superstition and prejudice In a world grown irrational and hostile to facts Science in the Soul is an essential collection by an indispensable author Praise for Science in the Soul Compelling rendered in gloriously spiky and opinionated prose Dawkins is one of the great science popularizers of the last half century The Christian Science Monitor Dawkins is a ferocious polemicist a defender of reason and enemy of superstition John Horgan Scientific American

Sexed Paul Neil Abramowitz, 2021-08-02 Sexed Sex d Hardwired by Nature Evolving by Choice is a first of a kind book about the sexual hardwiring of the heterosexual male While shining a spotlight on some of the predicaments of heterosexual male sexuality it takes a deep archeological dive into the meeting place of sex consciousness biology and intimacy In so doing it offers a granular look at the impact of our sexual hardwiring on our lived experience as men far beyond comedy and caricature or the superficial conversations society has thus far offered us Sexed offered both as a reference for therapists and a personal study guide for the curious and evolving and brings the reader closer to a more crystalized sense of sexual self agency access to intimacy and the opportunity to continue to bring the best possible version of himself to his relationship and the world Of course women readers can benefit too by gaining insight into the development and inner workings of the heterosexual man s mind and a broader understanding as to why the hardwiring and its impact has proven to be somewhat trans historical and transcultural

Companion to Environmental Studies Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines

have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

Psychiatry in Crisis Vincenzo Di Nicola, Drozd Stojanov, 2021-02-03 The field of academic psychiatry is in crisis everywhere It is not merely a health crisis of resource scarcity or distribution competing claims and practice models or level of development from one country to another but a deeper more fundamental crisis about the very definition and the theoretical basis of psychiatry The kinds of questions that represent this crisis include whether psychiatry is a social science like psychology or anthropology whether it is better understood as part of the humanities like philosophy history and literature or if the future of psychiatry is best assured as a branch of medicine based on genetics and neuroscience In fact the question often debated since the beginning of modern psychiatry concerns the biomedical model so that part of psychiatry's perpetual self questioning is to what extent it is or is not a branch of medicine This unique and bold volume offers a representative and critical survey of the history of modern psychiatry with deeply informed transdisciplinary readings of the literature and practices of the field by two professors of psychiatry who are active in practice and engaged in research and have dual training in scientific psychiatry and philosophy In alternating chapters presenting contrasting arguments for the future of psychiatry the two authors conclude with a dialogue between them to flesh out the theoretical research and practical implications of psychiatry's current crisis outlining areas of divergence consensus and fruitful collaborations to revision psychiatry today The volume is scrupulously documented but written in accessible language with capsule summaries of key areas of theory research and practice for the student and practitioner alike in the social and human sciences and in medicine psychiatry and the neurosciences

Why I Am Not a Buddhist Evan Thompson, 2020-01-28 A provocative essay challenging the idea of Buddhist exceptionalism from one of the world's most widely respected philosophers and writers on Buddhism and science Buddhism has become a uniquely favored religion in our modern age A burgeoning number of books extol the scientifically proven benefits of meditation and mindfulness for everything ranging from business to romance There are conferences courses and celebrities promoting the notion that Buddhism is spirituality for the rational compatible with cutting edge science indeed a science of the mind In this provocative book Evan Thompson argues that this representation of Buddhism is

false In lucid and entertaining prose Thompson dives deep into both Western and Buddhist philosophy to explain how the goals of science and religion are fundamentally different Efforts to seek their unification are wrongheaded and promote mistaken ideas of both He suggests cosmopolitanism instead a worldview with deep roots in both Eastern and Western traditions Smart sympathetic and intellectually ambitious this book is a must read for anyone interested in Buddhism's place in our world today Provided by publisher

Problems in Epistemology and Metaphysics Steven B. Cowan, 2020-02-06 Problems in Epistemology and Metaphysics takes a pro and con approach to two central philosophical topics Each chapter begins with a question Can We Have Knowledge How are Beliefs Justified What is the mind Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters covering core questions surrounding religious beliefs scientific knowledge truth being and reality this is a comprehensive introduction to debates lying at the heart of what we know how we know it and the nature of the world we live in

Classic French Noir Deborah Walker-Morrison, 2018-10-18 French film noir has long been seen as a phenomenon distinct from its Hollywood counterpart This book an innovative departure from conventional noir scholarship now adopts a biocultural approach to exploring the French genre through the years 1941-1959 Chapters reveal noir as a product of the social and cultural factors at play in occupied liberated and post war France marked by malaise at military defeat Nazi collaboration and the impact of industrialisation Furthermore the book uncovers the evolutionary mechanisms of sexuality and reproduction beneath the national context that drive gendered behaviour on screen During this period for example the emerging urgent demand for population growth coupled with the severe shortage of eligible males rendered the mating game particularly perilous for traditional women beginning to enter the workplace This explains the cynical yet seductive behaviour of the femme fatale Deborah Walker-Morrison focuses on the dangerous often deadly desires of an array of male and female character types moving past the celebrated fatal femme to tragic heroines psychopathic narcissists fatal hommes and gangster anti heroes The book re-examines productions by directors such as Henri-Georges Clouzot Jacques Becker and Jules Dassin and pulls together strands of sociological biological psychological and evolutionary science to create an illuminating study of the

intense human passions underlying the cut throat world of noir **Rebooting Clausewitz** Christopher Coker, 2017 An accessible and entertainingly written primer to the most influential book in the history of Western warfare *The Gene's-Eye View of Evolution* J. Arvid Ågren, 2021-07-21 Arvid Ågren has undertaken the most meticulously thorough reading of the relevant literature that I have ever encountered deploying an intelligent understanding to pull it into a coherent story As if that wasn't enough he gets it right Richard Dawkins To many evolutionary biologists the central challenge of their discipline is to explain adaptation the appearance of design in the living world With the theory of evolution by natural selection Charles Darwin elegantly showed how a purely mechanistic process can achieve this striking feature of nature Since then the way many biologists have thought about evolution and natural selection is as a theory about individual organisms Over a century later a subtle but radical shift in perspective emerged with the gene's eye view of evolution in which natural selection was conceptualized as a struggle between genes for replication and transmission to the next generation This viewpoint culminated with the publication of *The Selfish Gene* by Richard Dawkins Oxford University Press 1976 and is now commonly referred to as selfish gene thinking The gene's eye view has subsequently played a central role in evolutionary biology although it continues to attract controversy The central aim of this accessible book is to show how the gene's eye view differs from the traditional organismal account of evolution trace its historical origins clarify typical misunderstandings and by using examples from contemporary experimental work show why so many evolutionary biologists still consider it an indispensable heuristic The book concludes by discussing how selfish gene thinking fits into ongoing debates in evolutionary biology and what they tell us about the future of the gene's eye view of evolution *The Gene's Eye View of Evolution* is suitable for graduate level students taking courses in evolutionary biology behavioural ecology and evolutionary genetics as well as professional researchers in these fields It will also appeal to a broader interdisciplinary audience from the social sciences and humanities including philosophers and historians of science *Why We Disagree About Human Nature* Elizabeth Hannon, Tim Lewens, 2018-06-18 Is human nature something that the natural and social sciences aim to describe or is it a pernicious fiction What role if any does human nature play in directing and informing scientific work Can we talk about human nature without invoking either implicitly or explicitly a contrast with human culture It might be tempting to think that the respectability of human nature is an issue that divides natural and social scientists along disciplinary boundaries but the truth is more complex The contributors to this collection take very different stances with regard to the idea of human nature They come from the fields of psychology the philosophy of science social and biological anthropology evolutionary theory and the study of animal cognition Some of them are human nature enthusiasts some are sceptics and some say that human nature is a concept with many faces each of which plays a role in its own investigative niche Some want to eliminate the notion altogether some think it unproblematic others want to retain it with reforming modifications Some say that human nature is a target for investigation that the human sciences cannot do without

others argue that the term does far more harm than good The diverse perspectives articulated in this book help to explain why we disagree about human nature and what if anything might resolve that disagreement We Need to Change to Solve the Water Crisis: Humanity is not a Plague: How 10 Billion People can Exist Together Cees Buisman,2020-04-15 We need to change to solve the water crisis It is impossible for 10 billion people to exist together on this Earth as predicted for the year 2100 unless the richer part of the world no longer merely focuses on its own health prosperity and happiness and instead starts working seriously on developing a higher consciousness In this essay Cees Buisman sharply analyses some of the problems facing mankind such as fresh water shortages whilst overturning several clichés and offering unexpected positive solutions Overpopulation is not the problem the effects of our actions on the rest of the world have a much greater impact Back to nature is not the solution nor is an overreliance on science and innovation In fact large scale technologies could even increase our problems The growth of humanity depends on the growth of our consciousness We need to change now We Need to Change to Solve the Water Crisis published by Bornmeier Noordboer in 2018 as Humanity is not a Plague How 10 Billion People can Exist Together **Quinoa** Fan Zhu,2022-11-10 Quinoa Chemistry and Technology provides an overview of the chemistry processing and technology of quinoa grain and its components covering the development of quinoa grain in different parts of the world for food production including its structure molecular and chemical composition milling properties processing characteristics and food products Increasing demand for plant based gluten free foods that are nutritious healthy sustainable and affordable has caused quinoa cultivation to expand to over 70 countries due to its attractive nutritional and food security properties This practical resource is designed to support the development of quinoa in different sectors such as the food industry Thoroughly answers the question of why quinoa grain is so unique and special Provides background information on chemical and technological properties of the quinoa grain for food productions formulations and nutritional applications Presents information in a very systematic and comprehensive form useful to those actively working in quinoa development for food applications **Tim Noakes: The Quiet Maverick** Daryl Ilbury,2017-06-01 A dissident scientist a disrupted media On 5 February 2014 world renowned scientist Tim Noakes fired off a tweet into a highly volatile media space the fallout threatened to destroy his career This is the untold backstory Veteran journalist and writer Daryl Ilbury unveils layer by layer a combustible mix of ignorance suspicion and academic wrongdoing played out in a highly disrupted media space where consumers demand snappy answers to highly complex questions It's the story of society's historical distrust of science the fractious relationship between science and mainstream media the intricacies of human nutrition and the brutal fallout when a soft spoken scientist with a taste for social media and a flair for challenging convention voiced his maverick opinion Featuring exclusive interviews with Noakes as well as with people who have worked closely with him including former Springbok coach Jake White and polar swimmer Lewis Gordon Pugh as well as award winning journalists and fellow scientists and academics some of whom now consider Noakes dangerous and out of control this book promises to

be as controversial as the man himself
