MD argues that this failure was inevitable because the oncogene theory is incorrect or at least incomplete and based on a flawed concept of biology in which DNA controls our cellular function and therefore our health. Instead, Dr. Cowan tells us the somatic mutations seen in cancer cells are the result of a cellular deterioration that has little to do with oncogenes, DNA, or even the nucleus. The root cause is metabolic dysfunction that deteriorates the structured water that forms the basis of cytoplasmic and therefore cellular health. Despite mainstream medicine's failure to bring an end to suffering or deliver on its promises, it remains illegal for physicians to prescribe anything other than the standard of care for their cancer patients, no matter how dangerous and ineffective that standard may be, and despite the fact that gentler, more effective, and more promising treatments exist. While Dr. Cowan acknowledges that all of these treatments need more research, *Cancer and the New Biology of Water* is an impassioned plea from a long-time physician that these promising treatments merit our attention and research dollars, and that patients have the right to information, options, and medical freedom in matters of their own life and death.
